**PROPOSAL**

Date:- 27-June-2018

To

The Director,

**Sub:** Req- Proposal for organizing MDF (Mobile Developer Fest) @ CMR Technical Campus, Hyderabad in association with Google, under COEMWT in CSE Dept.

Respected Sir,

We the CSE Department from COEMWT requesting proposal for organizing MDF (Mobile Developer Fest) @ CMR Technical Campus, Hyderabad in association with Google, under COEMWT in CSE Dept

Objectives of this event are to inspire computer science and engineering student community on campus on mobile skilling, Offer high-quality, accelerated training to students on emerging mobile technologies and platform, showcase Google India's mobile skilling programme and the portfolio of open-source courses, Codelabs and certification and encourage students to aim for certification via self-paced online learning and offline training via Google-trained faculty and Developer Student Clubs.

Now we are planning to organize the MDF (Mobile Developer Fest) @ CMR Technical Campus on 26<sup>th</sup> and 27<sup>th</sup> July 2018.

Hence we request you to consider the Proposal & Suggest for the conduction of the programme.

Thanking you,

*Forwarded to Director

**Invitation**

Date:- 24-07-2018

**Dear Students and Faculties,**

On behalf of CMR Technical Campus, we have immense pleasure in inviting students to attend the **MDF (Mobile Developer Fest) @** CMR Technical Campus, Hyderabad in association with Google, under COEMWT, organizing by the Department of Computer Science and Engineering, CMR Technical Campus, Hyderabad, to be held on 26<sup>th</sup> and 27<sup>th</sup> July 2018.

Objectives of this event are to inspire computer science and engineering student community on campus on mobile skilling, Offer high-quality, accelerated training to students on emerging mobile technologies and platform, showcase Google India's mobile skilling programme and the portfolio of open-source courses, Codelabs and certification and encourage students to aim for certification via self-paced online learning and offline training via Google-trained faculty and Developer Student Clubs We request all to participate and make it a grand success.

**Venue:** Auditorium, Block D, CMRTC Hyderabad

**Date and Time:** 26<sup>th</sup> and 27<sup>th</sup> July 2018, 9:20 am-4:00 p.m.

For further details kindly visit <https://events.withgoogle.com/mdf/>

Thanking you and looking forward for your participation.

Thanking you,

Dr. K. Srujan Raju  
Head – CSE Dept

**NOTE:**

Hi everyone,

Request you to mark your attendance at the Registration Sheet for MDF - Hyderabad dated July 26th and 27th, 2018  
Please note that you all have to click the same to request for the access.

Kindly be present sharp @ 8:30am as the session begins @ 9am.  
Please refer to the link below for POC details (both the colleges) along with the venue address:

TA's list for MDF - Hyderabad along with the venue

On Thu, Jul 19, 2018 at 12:49 AM BHUPINDER SINGH SABHARWAL <bsabharwal@google.com> wrote:

## WE WELCOME YOU!!

Dear All,

It gives us an immense pleasure to roll out our 6th MDF in the city of Hyderabad dated July 26th - 27th, 2018. MDF is a Google event which creates an outreach and provide awareness among the participants about different Google products, courses, developer stories and initiatives happening in India.

We welcome you all to be a part of this fest.

We really appreciate your help for being TA's. Kindly have a look at recent Agenda for MDF here.

Android Codelabs

Codelab I : Build your first Android App

Codelabs II : Building the Stamp Collector app

Codelab III : Stamp Collector 2.0 - Storing Data

Please find the attached content for Android codelabs below. I would request / recommend you to perform all the codelabs at least once and learn more about the concepts before the event:

### Android Track Content

To view the content mentioned above, you all have to click the same and request for the access.

Request you all to fill in the Registration Sheet to confirm your attendance.

Kindly be present sharp @ 8:30am as the session begins @ 9am.

Please refer to the link below for POC details (both the colleges) along with the venue address:

TA's list for MDF - Hyderabad along with the venue

Please note some following important key-points for the TA session:

- Please bring your own working laptop in which latest Development environment is already installed(Android Track).
- Kindly make sure, you perform all the codelabs at least once on your own laptop prior to joining the TA session.
- Kindly get yourself familiarized with the Coding and Concepts of respective Codelabs.
- Please reach at the venue 30 mins before your session begins.

**Note:** We will be updating the exact location of the Lab soon in this same trix

Feel free to reach out to me in case of any further queries.

We are excited to interact with all of you, Happy Learning!

## Android Studio Setup

<b>1. Before you begin (System Requirements)</b>	<b>1</b>
<b>2. Install Android Studio</b>	<b>2</b>
2.1. Installing the Java Development Kit	2
2.2. Installing Android Studio	4
<b>3. Create “Hello World” app</b>	<b>25</b>
3.1 Create the “Hello World” app	25
<b>4. Create a virtual device (emulator)</b>	<b>31</b>
4.1 Create a virtual device	31
<b>5. Run your app on an emulator</b>	<b>38</b>
5.1 Run your app on an emulator	38

This doc will show you how to setup Android Studio on your system and run your first Android app called “Hello World”. It has the following sections:

1. [Before you begin \(System Requirements\)](#)
2. [Install Android Studio](#)
3. [Create “Hello World” app](#)
4. [Create a virtual device \(emulator\)](#)
5. [Run your app on an emulator](#)

### **1. Before you begin (System Requirements)**

These are the system requirements for Android Studio and Android development. Make sure your system has the minimum requirements. Since, Android Studio is continuously updated and improved make sure you refer to the latest ones [here](#) and for Android Emulator [here](#).

#### **Windows:**

- Microsoft® Windows® 7/8/10 (32- or 64-bit)
- 3 GB RAM minimum, 8 GB RAM recommended; plus 1 GB for the Android Emulator
- 2 GB of available disk space minimum,
- 4 GB Recommended (500 MB for IDE + 1.5 GB for Android SDK and emulator system image)
- 1280 x 800 minimum screen resolution

# Google Developers Training

---

## Mac:

Mac® OS X® 10.10 (Yosemite) or higher, up to 10.13 (macOS High Sierra)  
3 GB RAM minimum, 8 GB RAM recommended; plus 1 GB for the Android Emulator  
2 GB of available disk space minimum,  
4 GB Recommended (500 MB for IDE + 1.5 GB for Android SDK and emulator system image)  
1280 x 800 minimum screen resolution

## Linux:

GNOME or KDE desktop  
Tested on Ubuntu® 14.04 LTS, Trusty Tahr (64-bit distribution capable of running 32-bit applications)  
64-bit distribution capable of running 32-bit applications  
GNU C Library (glibc) 2.19 or later  
3 GB RAM minimum, 8 GB RAM recommended; plus 1 GB for the Android Emulator  
2 GB of available disk space minimum,  
4 GB Recommended (500 MB for IDE + 1.5 GB for Android SDK and emulator system image)  
1280 x 800 minimum screen resolution

## 2. Install Android Studio

Android Studio is Google's IDE for Android apps. Android Studio gives you an advanced code editor and a set of app templates. In addition, it contains tools for development, debugging, testing, and performance that make it faster and easier to develop apps. You can test your apps with a large range of preconfigured emulators or on your own mobile device, and build production APKs for publication.

**Note:** Android Studio is continually being improved. For the latest information on system requirements and installation instructions, refer to the documentation at [developer.android.com](http://developer.android.com).

To get up and running with Android Studio:

- You may need to install the Java Development Kit - Java 7 or higher.
- Install Android Studio

Android Studio is available for Windows, Mac, and Linux computers. The installation is similar for all platforms. Any differences will be noted in the sections below.

### 2.1. Installing the Java Development Kit

1. On your computer, open a terminal window.
2. Type `java -version`

# Google Developers Training

---

The output includes a line:

```
Java(™) SE Runtime Environment (build 1.X.0_05-b13)
```

**X** is the version number to look at.

- If this is 7 or greater, you can move on to installing Android Studio.
- If you see a Java SE version is below 7 or if Java is not installed, you need to install the latest version of the Java SE development kit before installing Android Studio.

To download the Java Standard Edition ( ) Development Kit (JDK):

1. Go to the [Oracle Java SE downloads page](#).
2. Click the Java SE Downloads icon to open the [Java SE Development Kit 8 Downloads page](#).
3. In the box for the latest Java SE Development kit, you need to accept the License Agreement in order to proceed. Then download the version appropriate for the computer you are developing on.

**Important:** Do not go to the demos and samples (the menus look very similar, so make sure to read the heading at the top).

4. Install the development kit. Once the installation of the JDK is completed — it should only take a few minutes — you can confirm it's correct by checking the Java version from the command line.
5. Open a terminal window and enter `Type java -version` again to verify that installation has been successful.
6. Set the `JAVA_HOME` environment variable to the installation directory of the JDK.

## Windows:

1. Set `JAVA_HOME` to the installation location.
2. Start > Control Panel > System > Advanced System Settings > Environment Variables System Variables > New
  - o Variable name: `JAVA_HOME`
  - o Variable value: `C:\Program Files\Java\jdk1.7.0_80` (or whatever version your installation is!)
3. If the variable already exists, update it to this version of the JDK.
4. Verify your `JAVA_HOME` variable from a `cmd.exe` terminal: `echo %JAVA_HOME%`

See also: [https://docs.oracle.com/cd/E19182-01/820-7851/inst\\_cli\\_jdk\\_javahome\\_t/](https://docs.oracle.com/cd/E19182-01/820-7851/inst_cli_jdk_javahome_t/)

# Google Developers Training

---

## Mac:

1. Open Terminal.
2. Confirm you have JDK by typing "which java".
3. Check that you have the needed version of Java, by typing "java -version".
4. Set JAVA\_HOME using this command in Terminal:  
`export JAVA_HOME=$(/usr/libexec/java_home)`
5. enter `echo $JAVA_HOME` to confirm the path.

## Linux:

See: [https://docs.oracle.com/cd/E19182-01/820-7851/inst\\_cli\\_jdk\\_javahome\\_t/](https://docs.oracle.com/cd/E19182-01/820-7851/inst_cli_jdk_javahome_t/)

**Important:** Don't install Android Studio until after the Java JDK is installed. Without a working copy of Java, the rest of the process will not work. If you can't get the download to work, look for error messages, and search online to find a solution.

## Basic Troubleshooting:

- There is no UI, Control Panel, or Startup icon associated with the JDK.
- Verify that you have correctly installed the JDK by going to the directory where you installed it. To identify where the JDK is, look at your PATH variable and/or search your computer for the "jdk" directory or the "java" or "javac" executable.

## 2.2. Installing Android Studio

1. Follow these installation steps depending on your platform (Windows, Mac or Linux).
2. After finishing the install, the Setup Wizard will download and install some additional components. Be patient, this might take some time depending on your internet speed, and some of the steps may seem redundant.
3. When the download completes, Android Studio will start, and you are ready to create your first project.

**Note:** Android Studio is continually being improved. For latest instructions to download and install Android Studio navigate to the [Android developers site](#) and [install Android Studio](#).

## Windows:

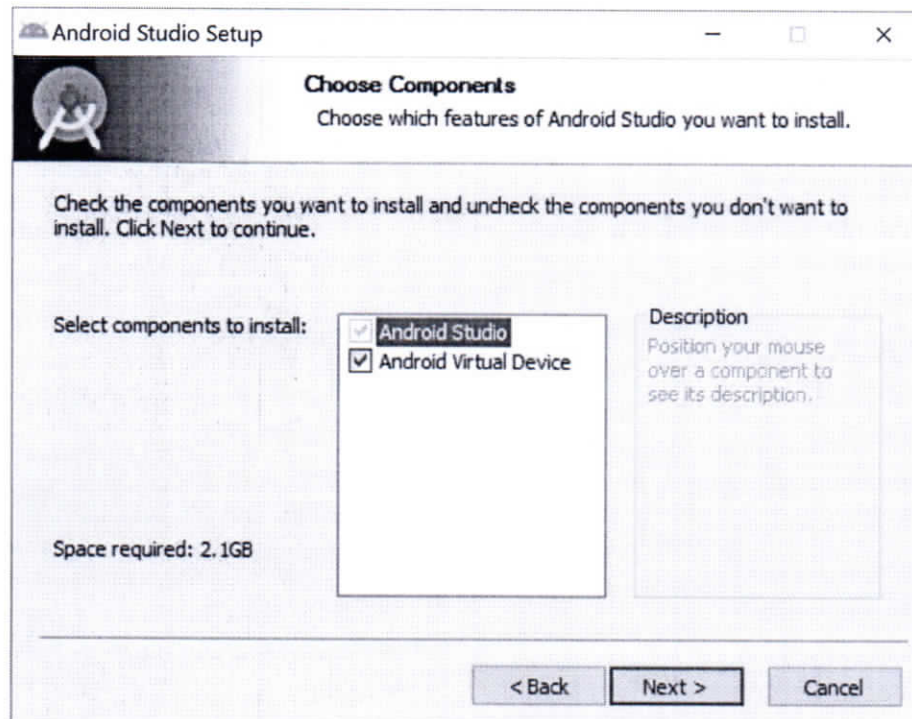

1. Download the Android Studio installer (.exe file) [here](#).
2. Launch the .exe file you downloaded.

# Google Developers Training

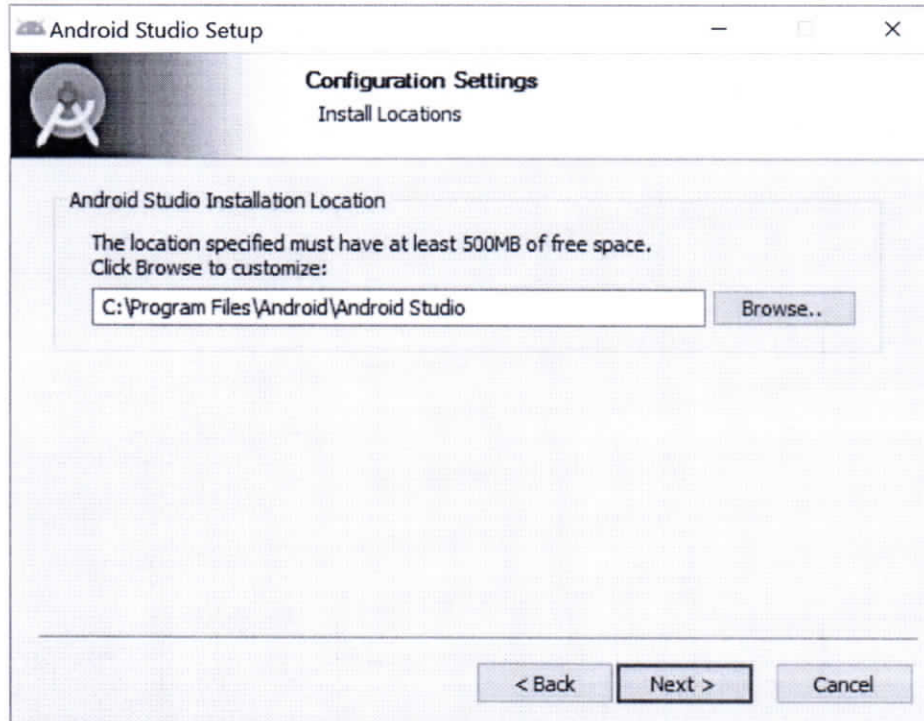

3. Follow the setup wizard to install Android Studio and any necessary SDK tools.

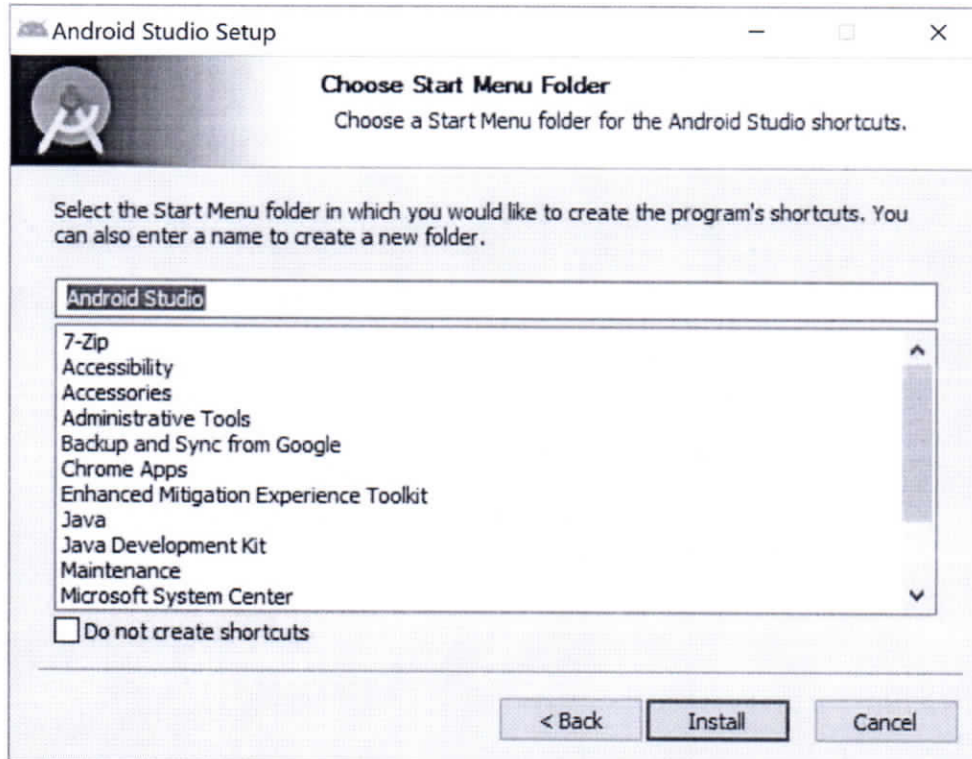

# Google Developers Training

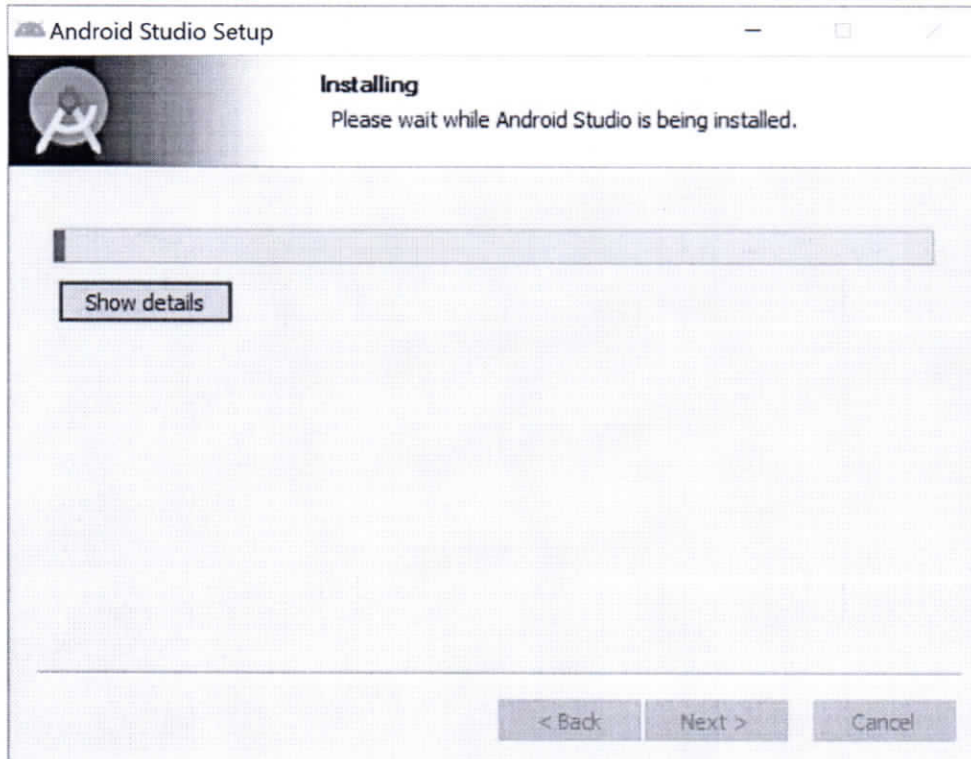

# Google Developers Training

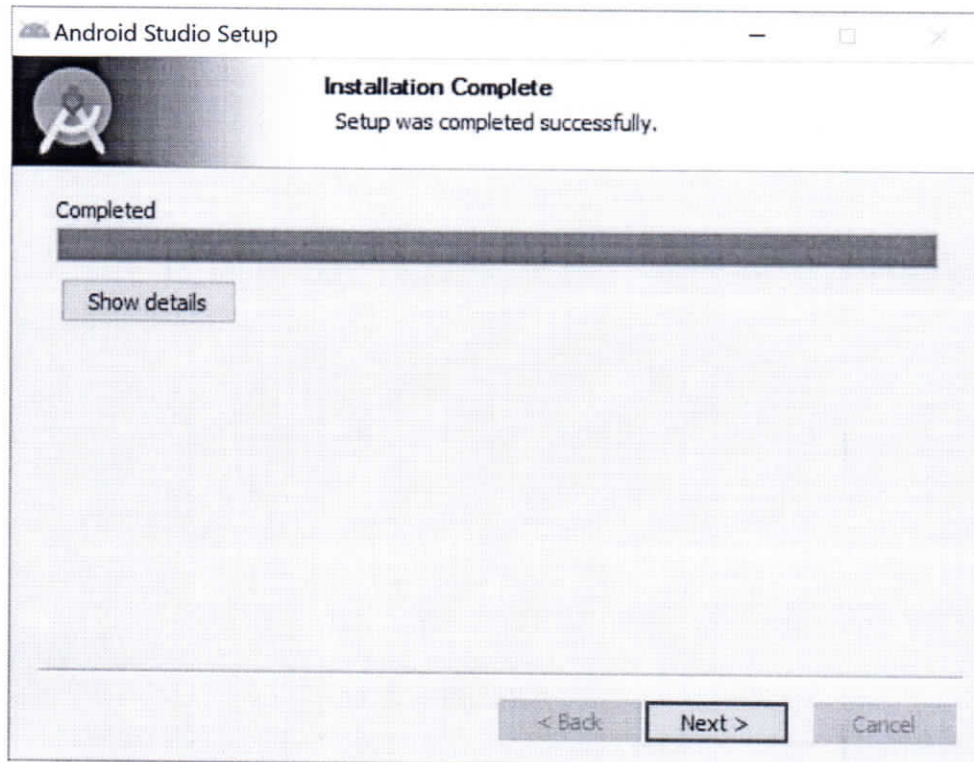

# Google Developers Training

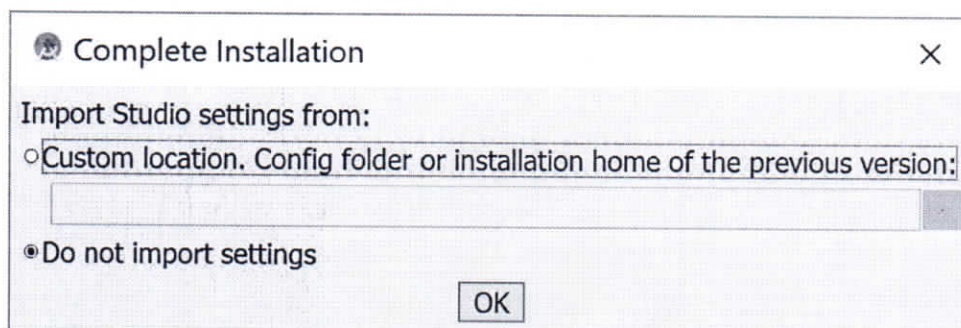

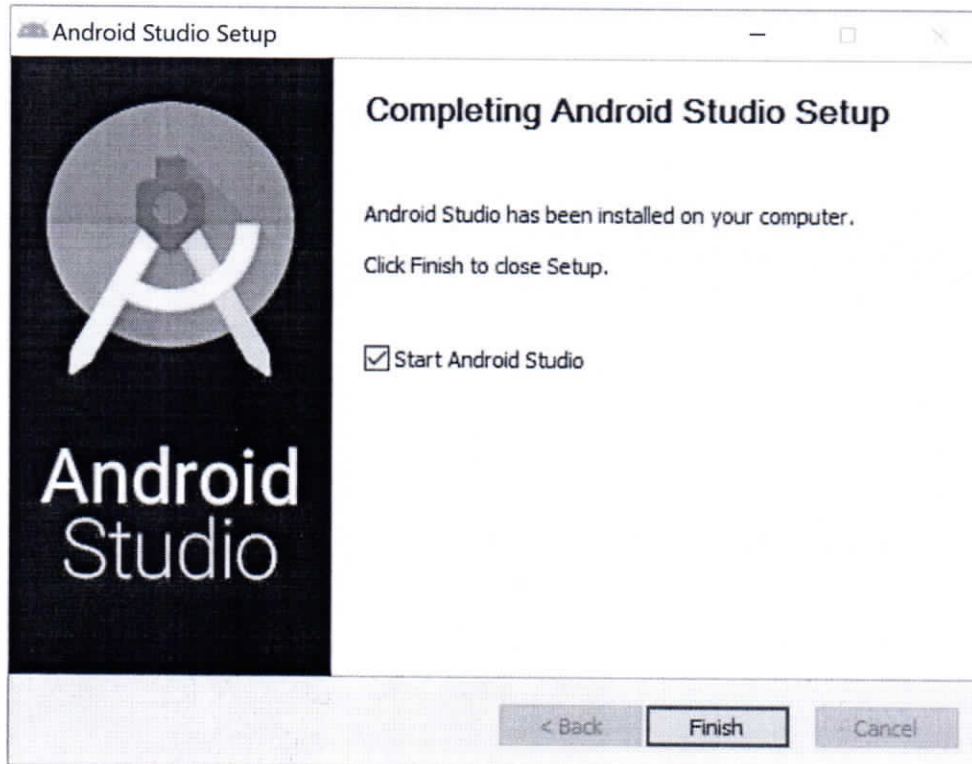

# Google Developers Training

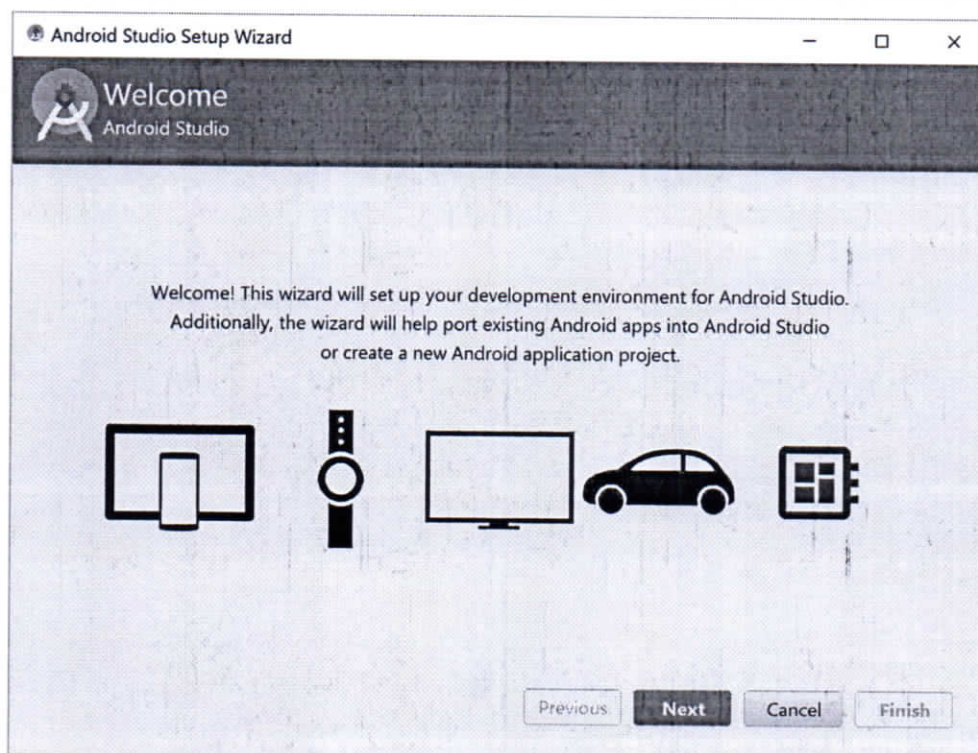

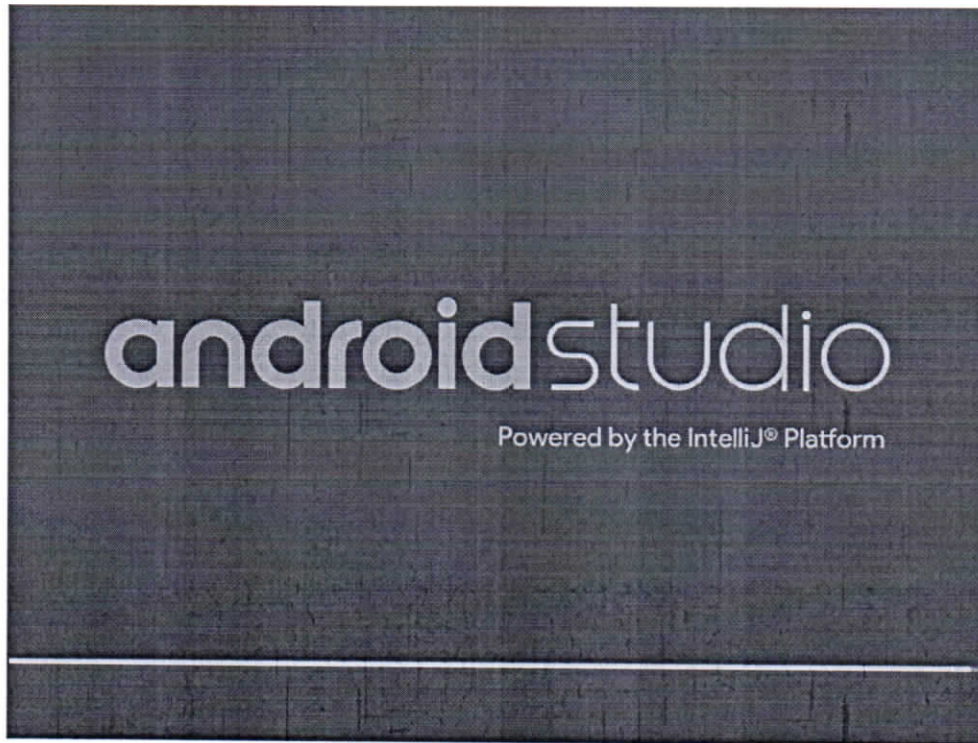

# Google Developers Training

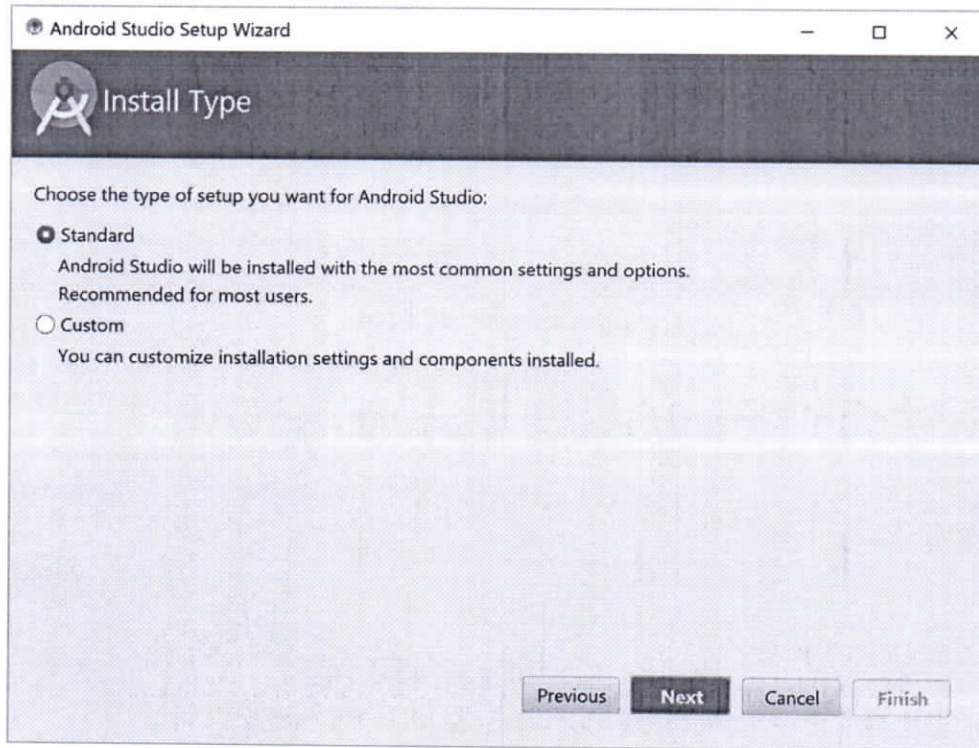

# Google Developers Training

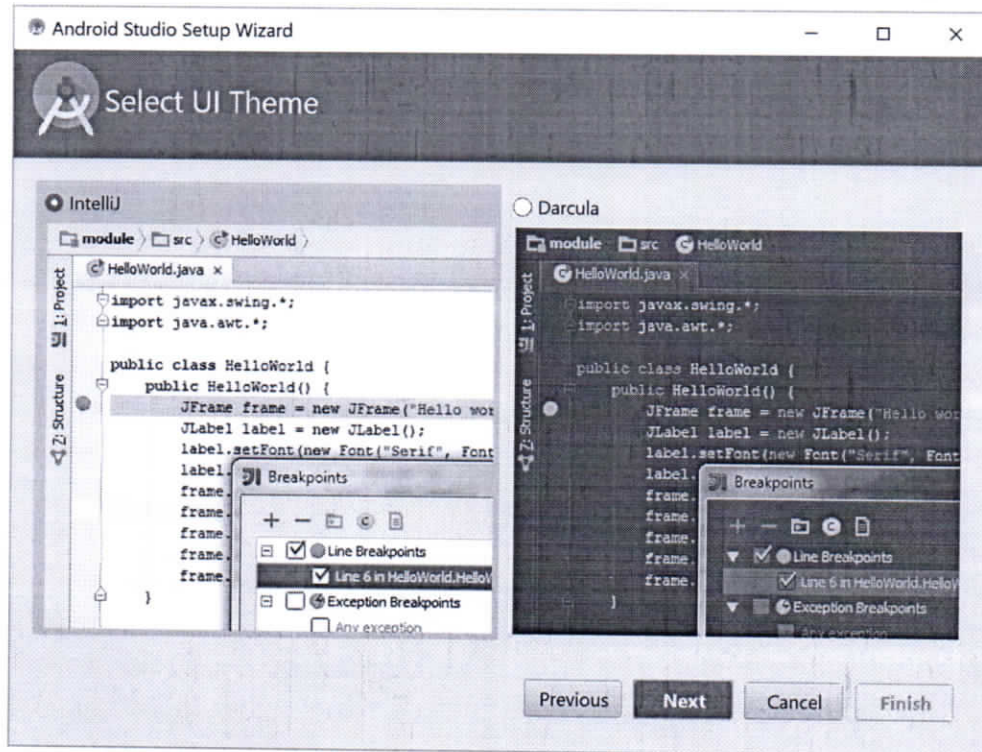

# Google Developers Training

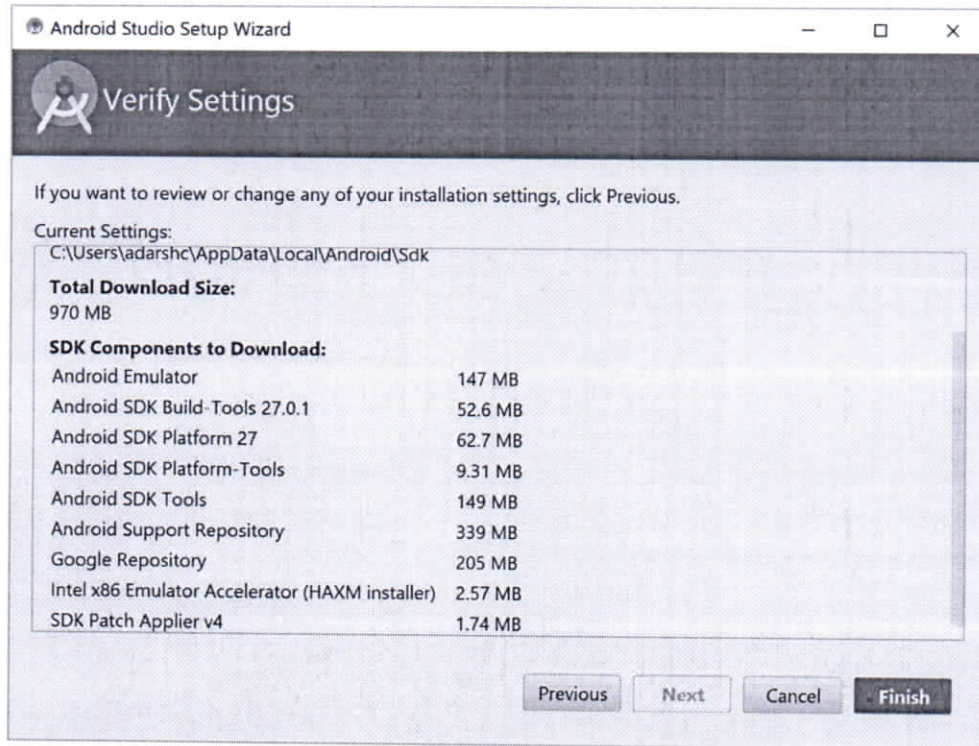

# Google Developers Training

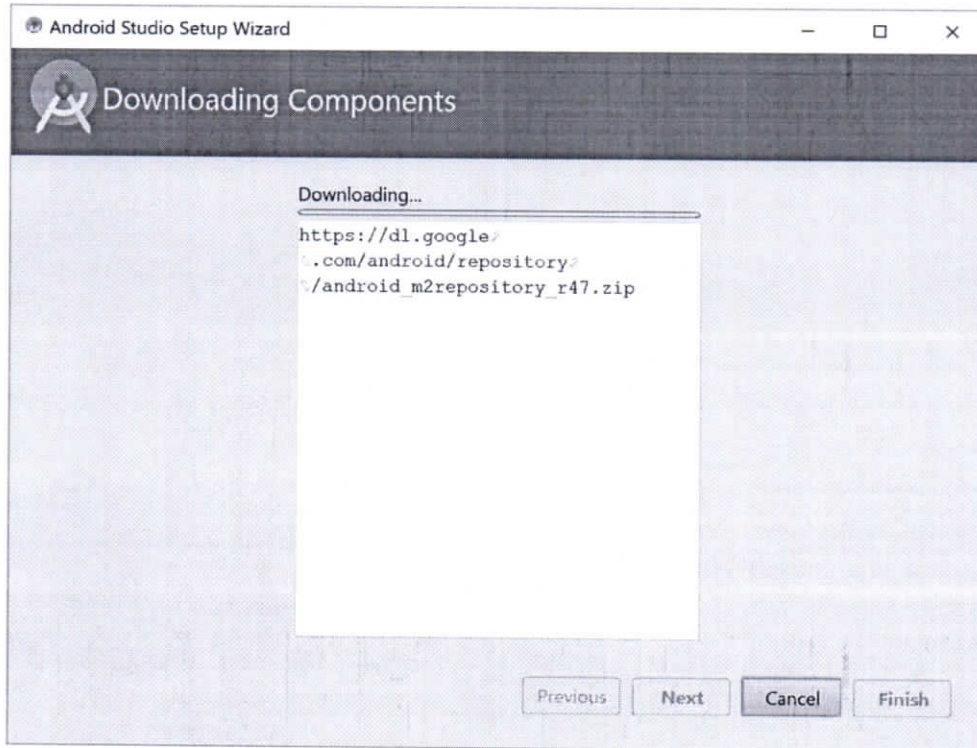

# Google Developers Training

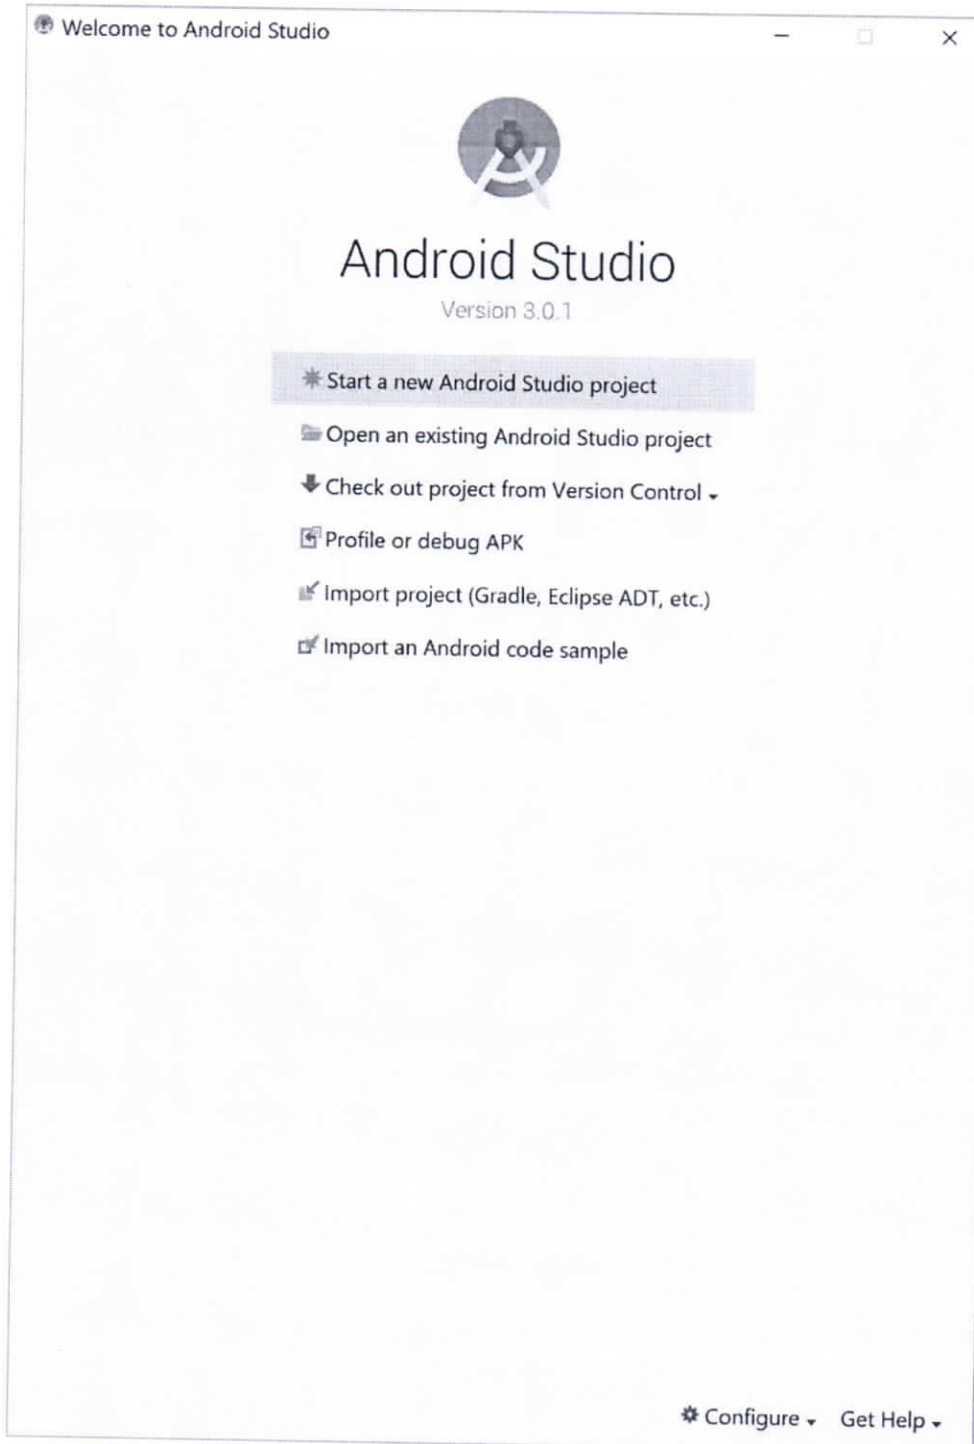

# Google Developers Training

# Google Developers Training

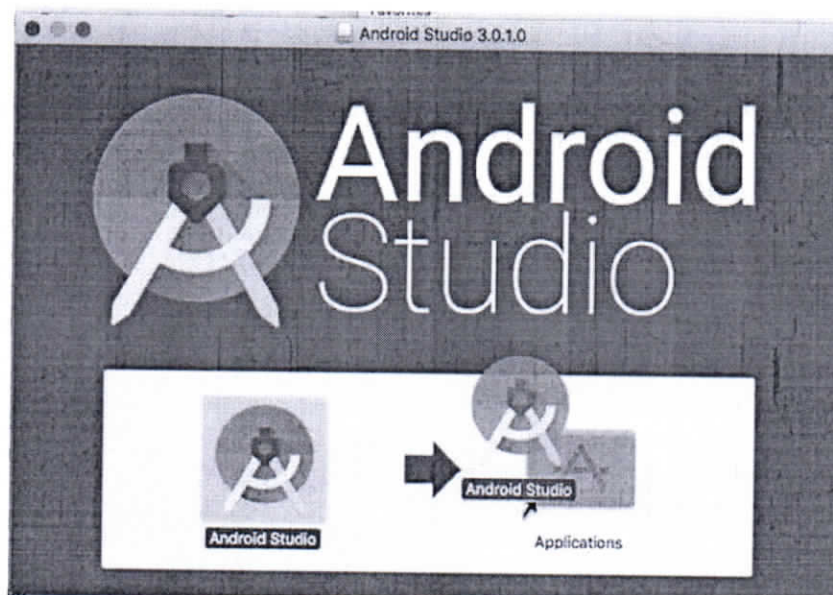

# Google Developers Training

---

## Mac:

1. Download the Android Studio DMG file [here](#).
2. Launch the Android Studio DMG file.
3. Drag and drop Android Studio into the Applications folder, then launch Android Studio.

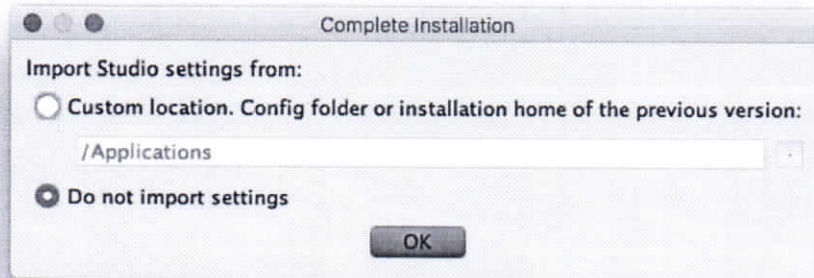

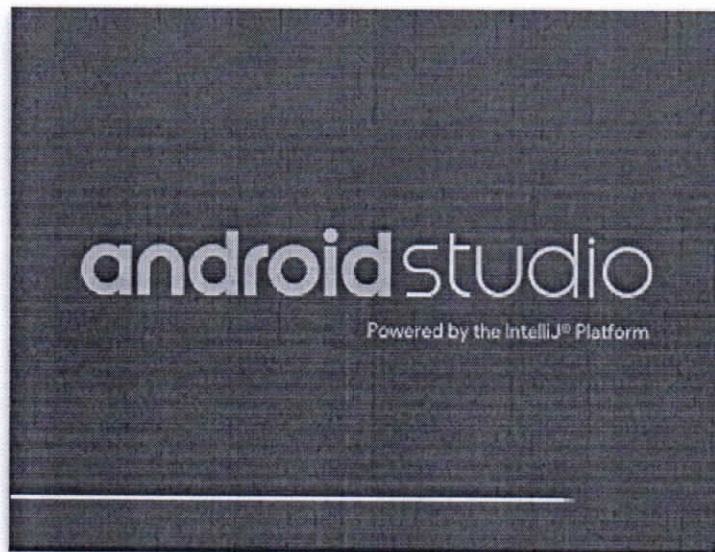

# Google Developers Training

---

4. Select whether you want to import previous Android Studio settings, then click OK.

5. The Android Studio Setup Wizard guides you through the rest of the setup, which includes downloading Android SDK components that are required for development.

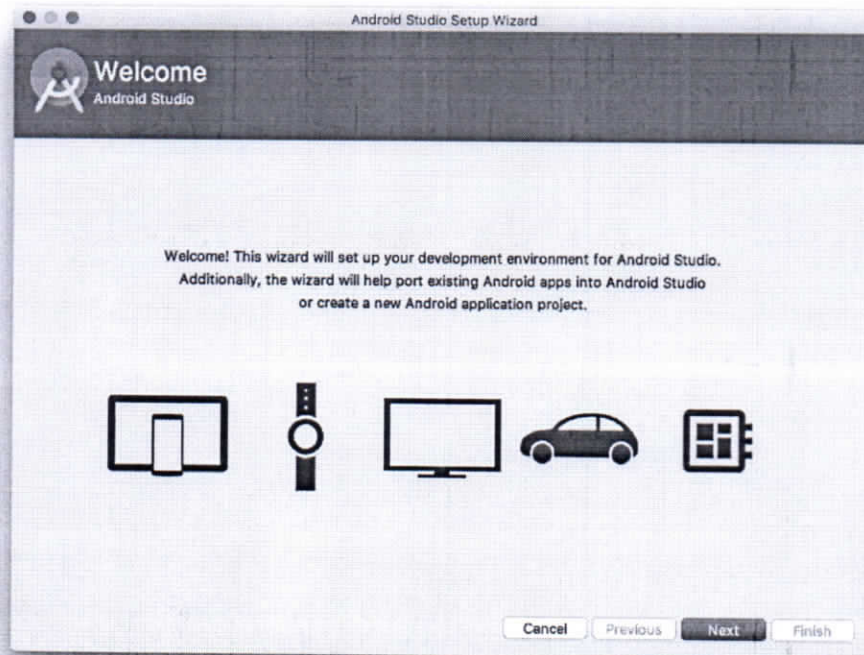

# Google Developers Training

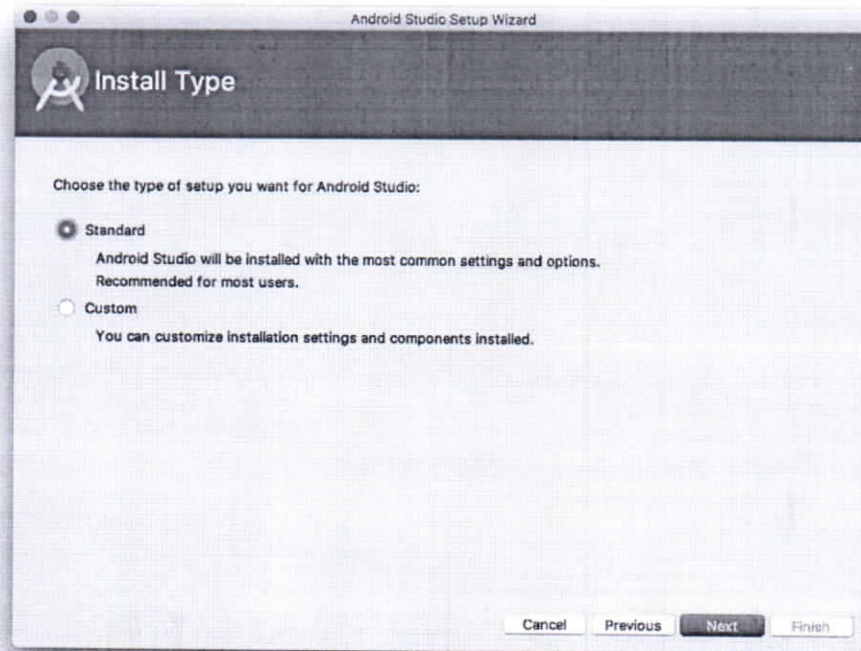

---

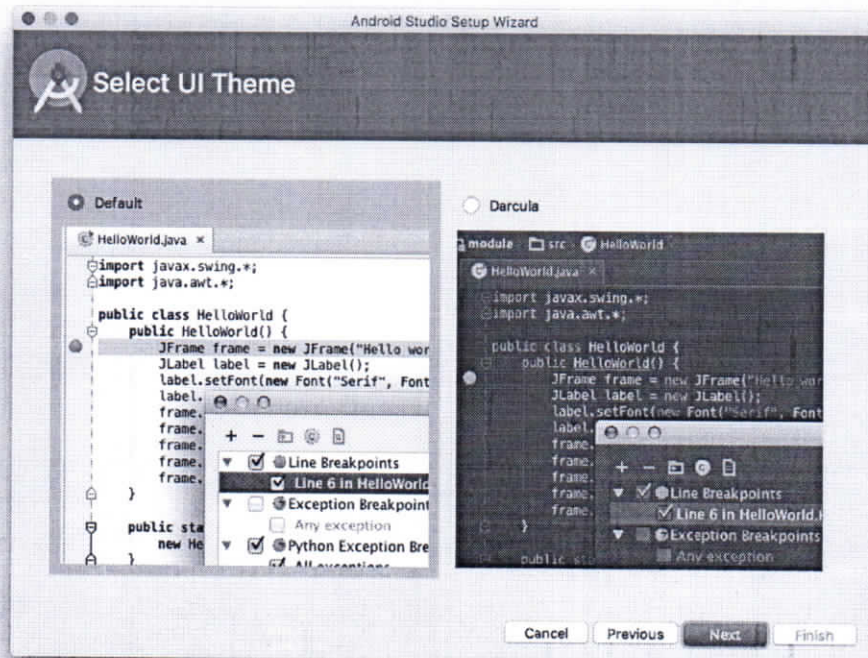

# Google Developers Training

---

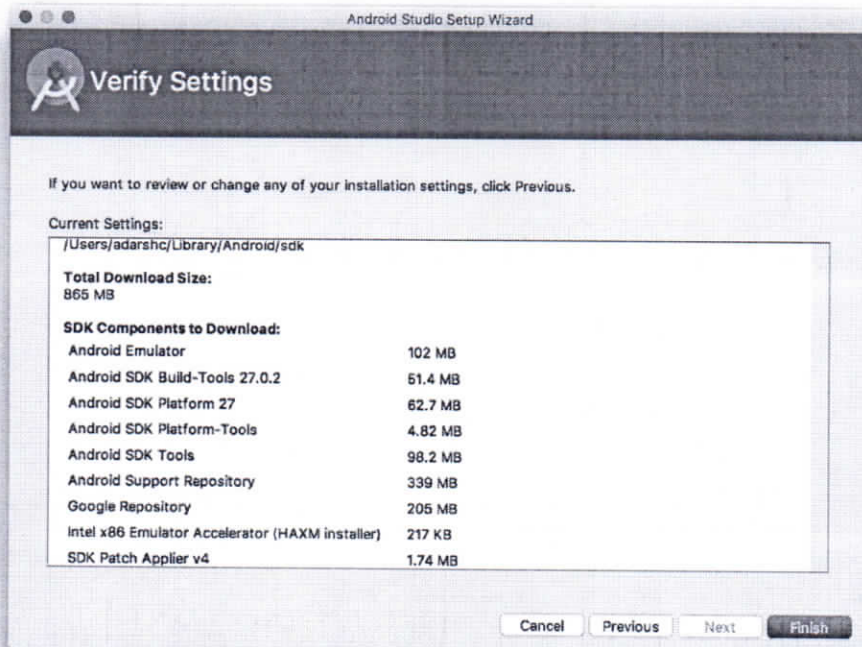

# Google Developers Training

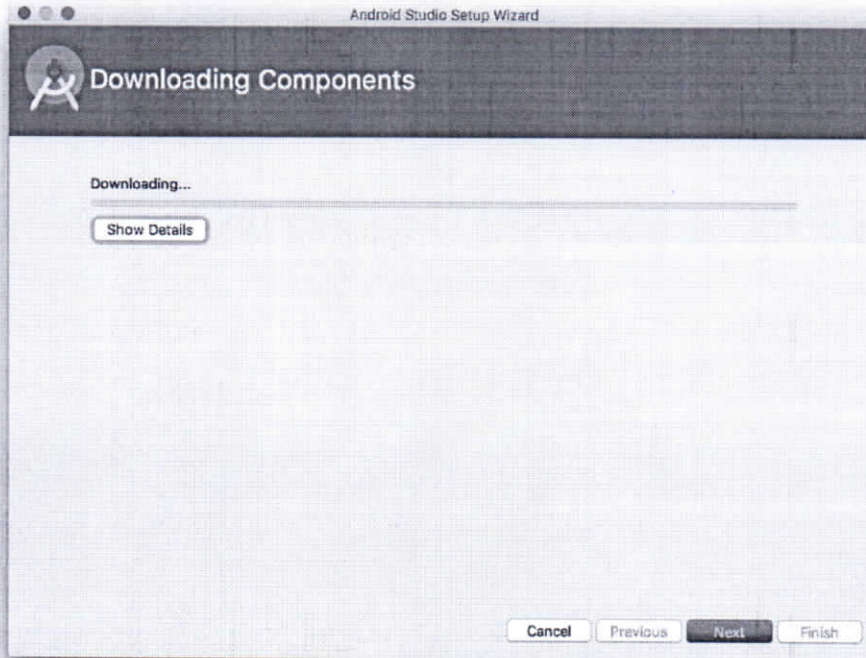

# Google Developers Training

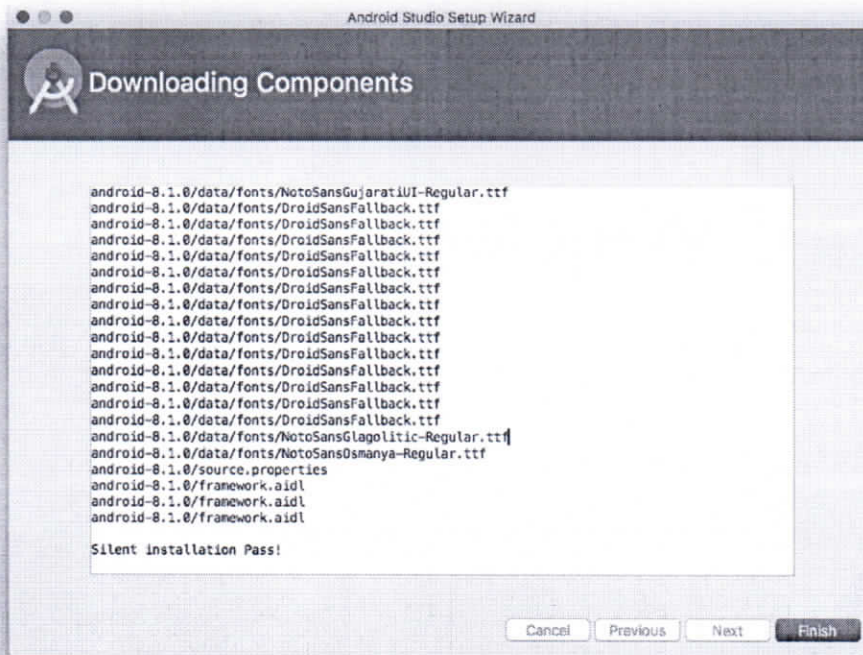

# Google Developers Training

---

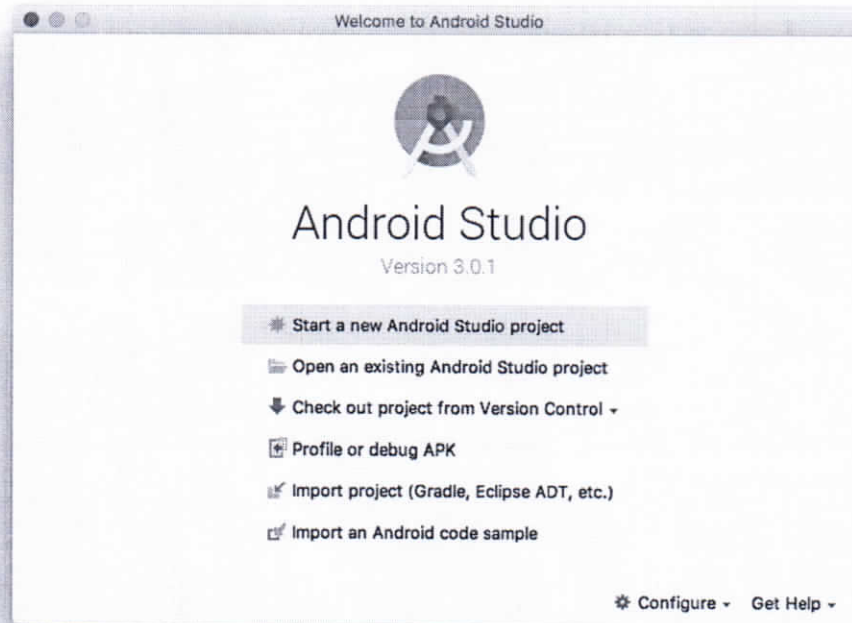

# Google Developers Training

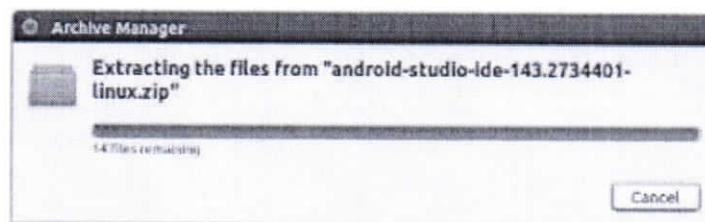

# Google Developers Training

## Linux:

1. Download the Android Studio .zip file for Linux [here](#).
2. Unpack the .zip file you downloaded to an appropriate location for your applications, such as within /usr/local/ for your user profile, or /opt/ for shared users.

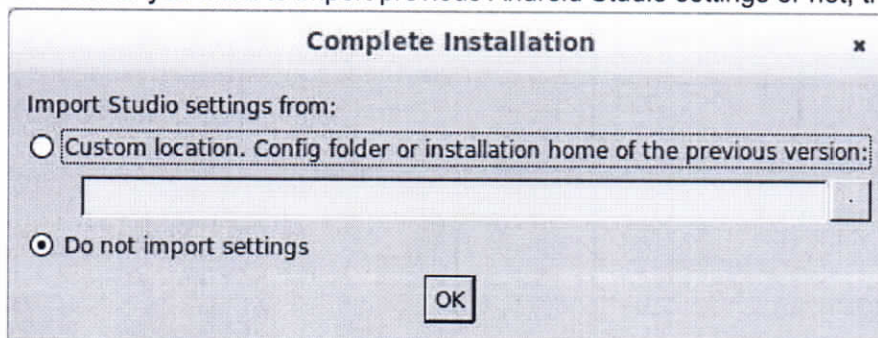

3. To launch Android Studio, open a terminal, navigate to the android-studio/bin/ directory, and execute studio.sh.

# Google Developers Training

```
adarshc@adarshc-glaptop: ~/Desktop/android-studio/bin
File Edit View Search Terminal Help
adarshc@adarshc-glaptop:~/Desktop/android-studio/bin$ ./studio.sh
```

4. Select whether you want to import previous Android Studio settings or not, then click OK.

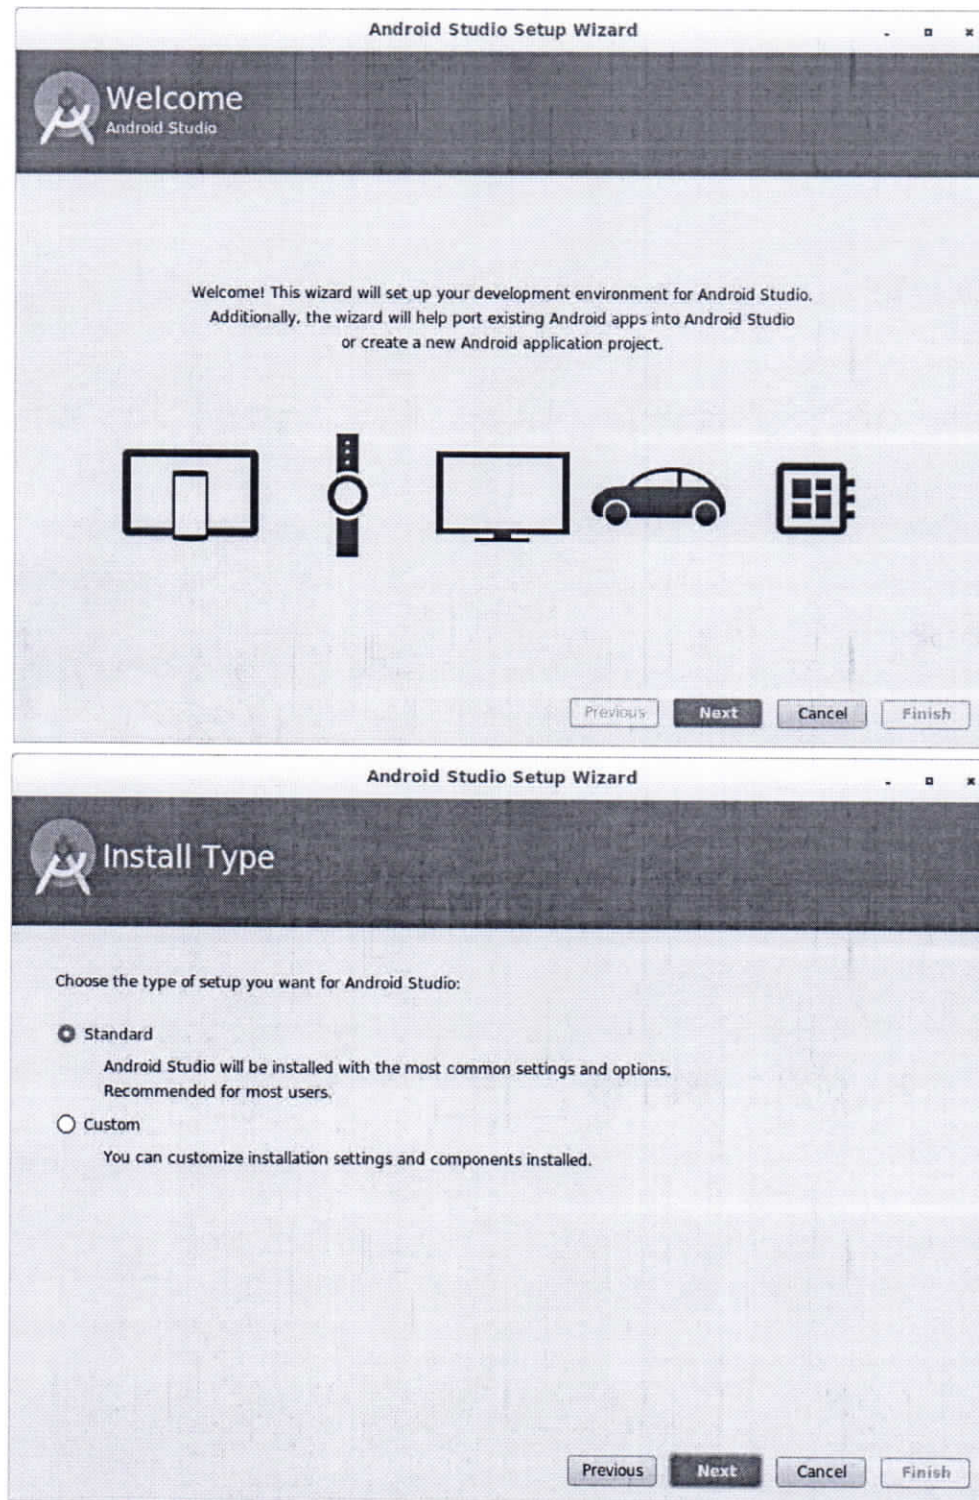

5. The Android Studio Setup Wizard guides you through the rest of the setup, which includes downloading Android SDK components that are required for development.

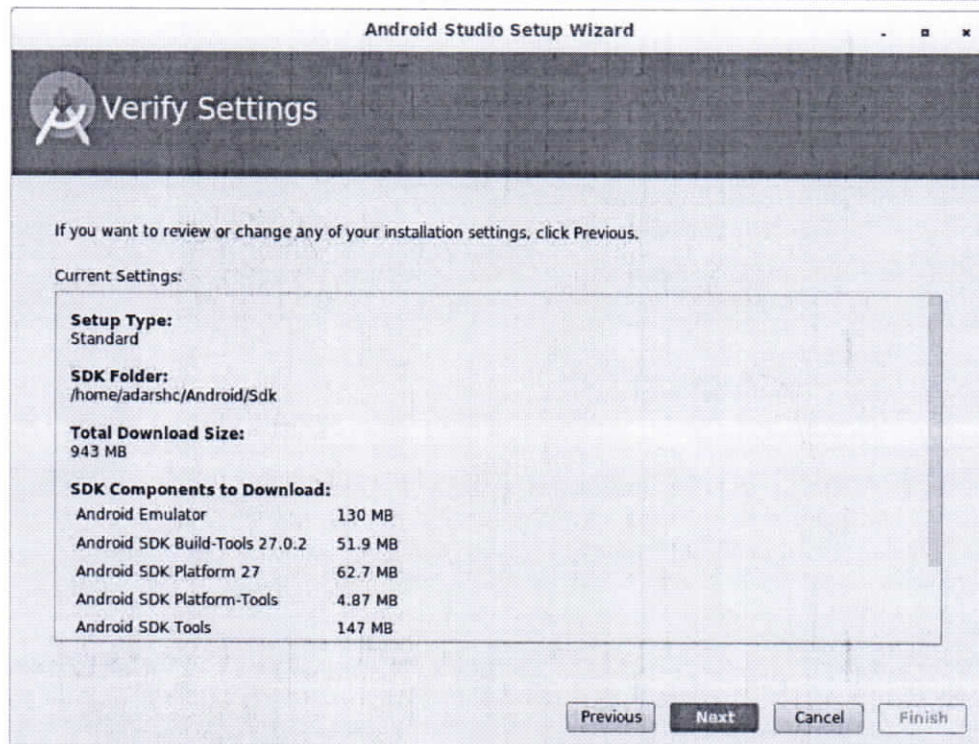

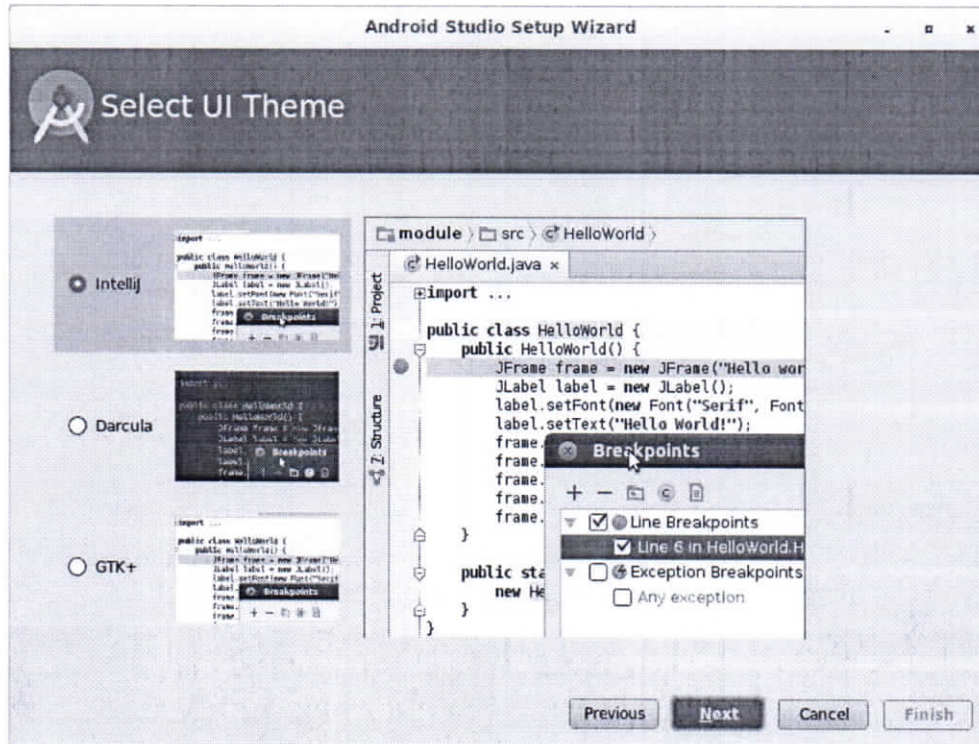

# Google Developers Training

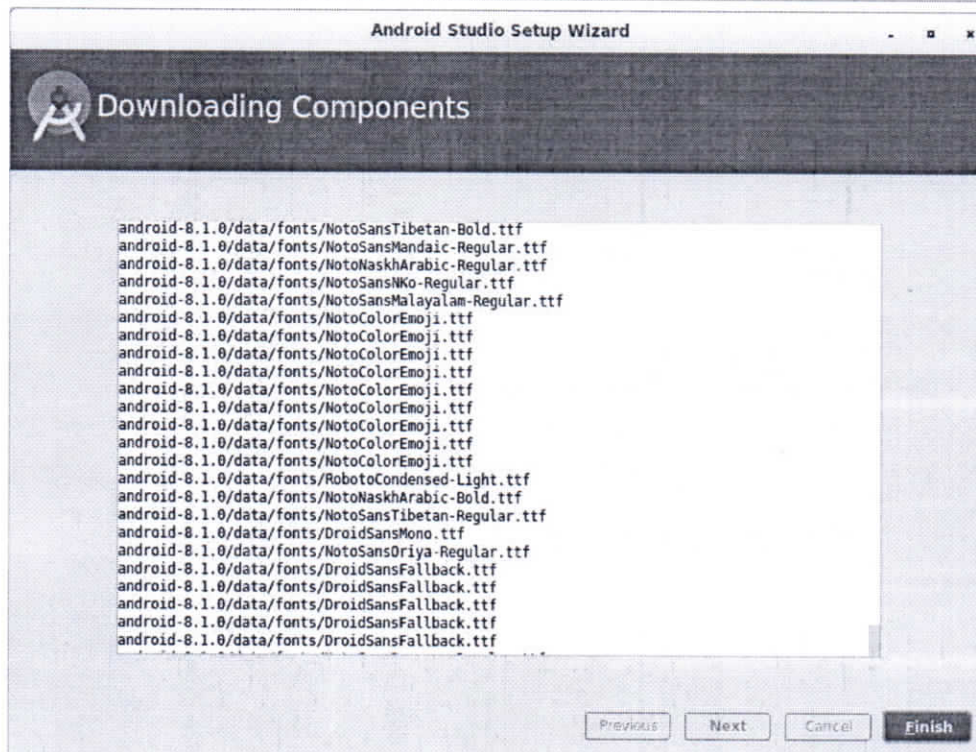

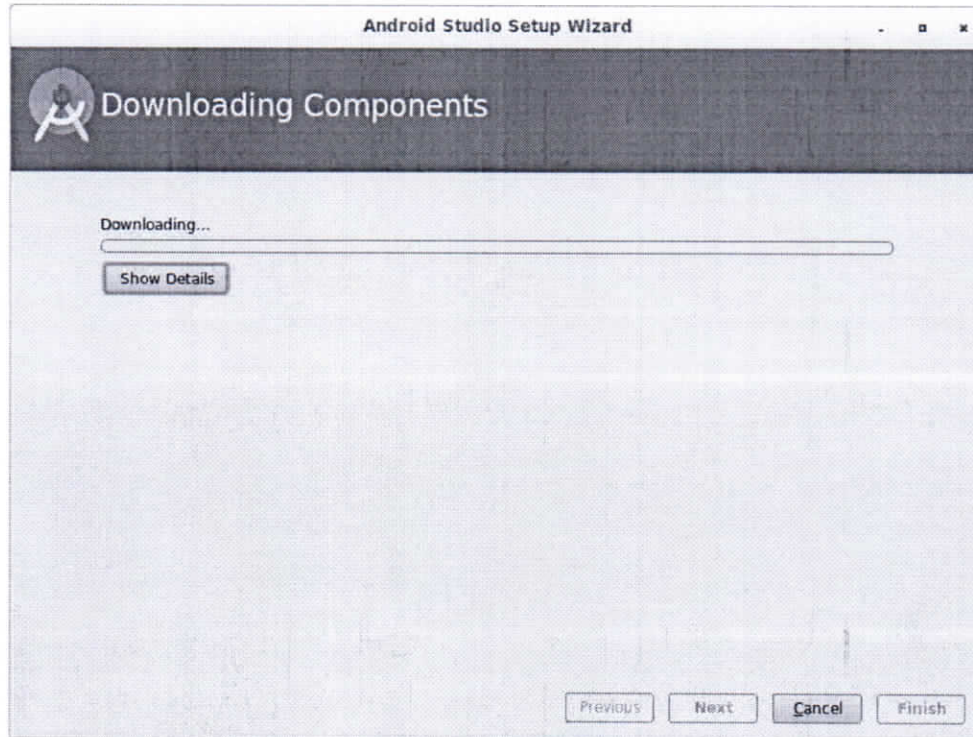

# Google Developers Training

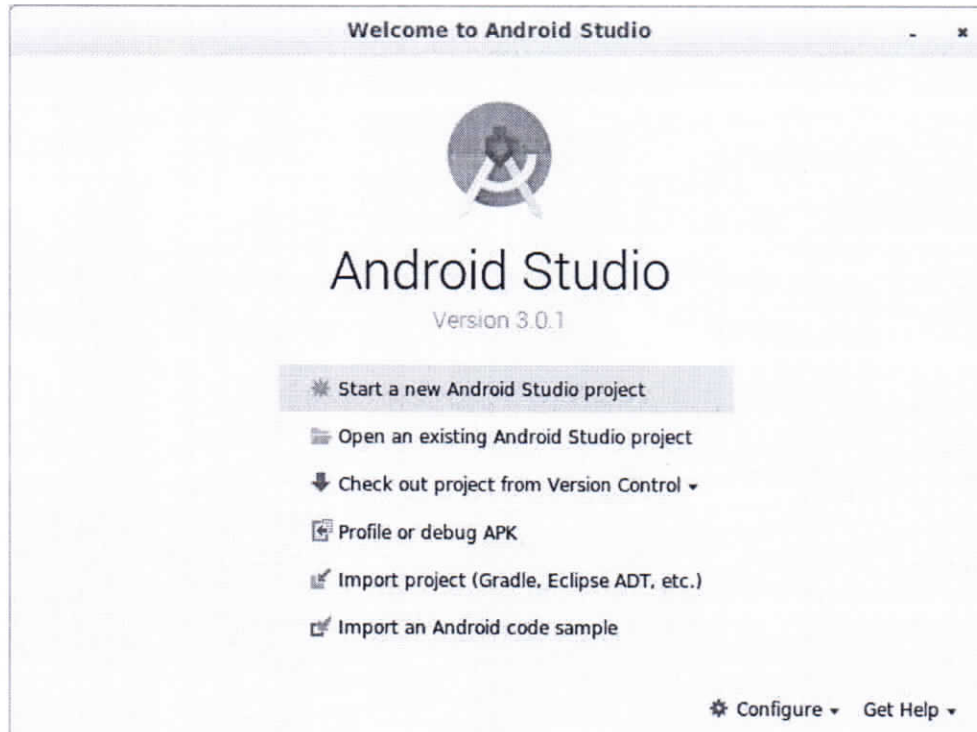

# Google Developers Training

# Google Developers Training

**Tip:** To make Android Studio available in your list of applications, select Tools > Create Desktop Entry from the Android Studio menu bar.

**Required libraries for 64-bit machines:** If you are running a 64-bit version of Ubuntu, you need to install some 32-bit libraries with the following command:

```
sudo apt-get install libc6:i386 libncurses5:i386 libstdc++6:i386 lib32z1 libbz2-1.0:i386
```

If you are running 64-bit Fedora, the command is:

```
sudo yum install zlib.i686 ncurses-libs.i686 bzip2-libs.i686
```

As new tools and other APIs become available, Android Studio tells you with a pop-up, or you can check for updates by clicking Android Studio > Check for Updates.

**Troubleshooting:** If you run into problems with your installation, check the latest documentation, programming forums, or get help from you instructors.

### 3. Create “Hello World” app

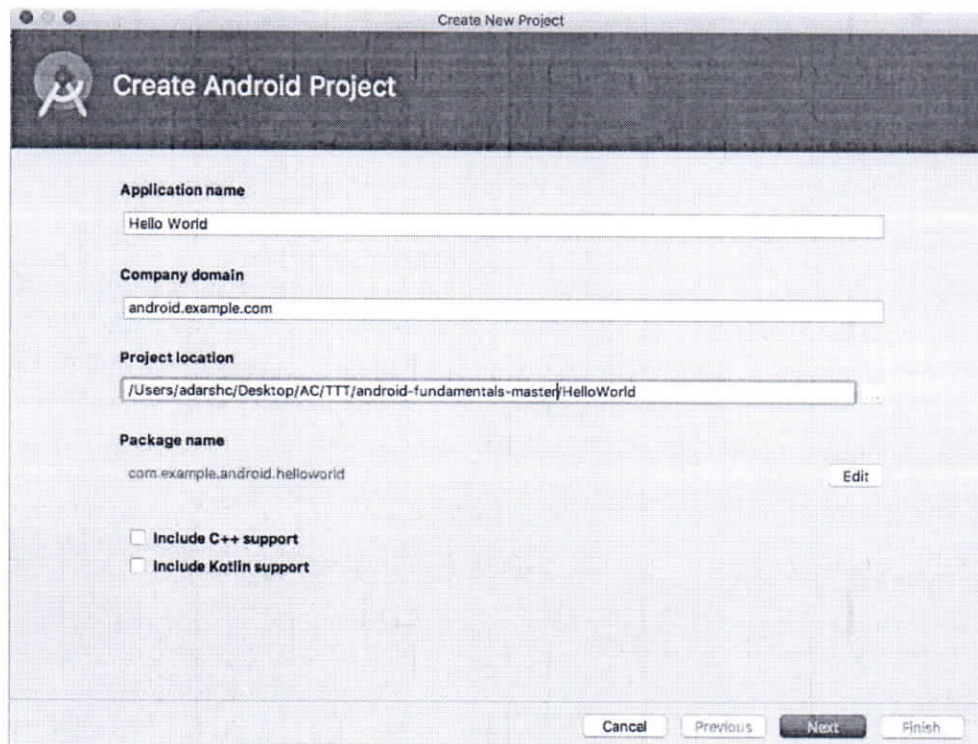

In this task, you will implement the “Hello World” app to verify that Android studio is correctly installed and learn the basics of developing with Android Studio.

# Google Developers Training

## 3.1 Create the “Hello World” app

1. Launch Android Studio if it is not already opened.
2. In the main **Welcome to Android Studio** window, click “Start a new Android Studio project”.
3. In the **New Project** window, give your application an **Application Name**, such as “Hello World”.
4. Verify the Project location, or choose a different directory for storing your project.
5. Choose a unique **Company Domain**.
  - Apps published to the Google Play Store must have a unique package name. Since domains are unique, prepending your app's name with your or your company's domain name is going to result in a unique package name.
  - If you are not planning to publish your app, you can accept the default example domain. Be aware that changing the package name of your app later is extra work.
6. Verify that the default **Project location** is where you want to store your Hello World app and other Android Studio projects, or change it to your preferred directory. Click Next.

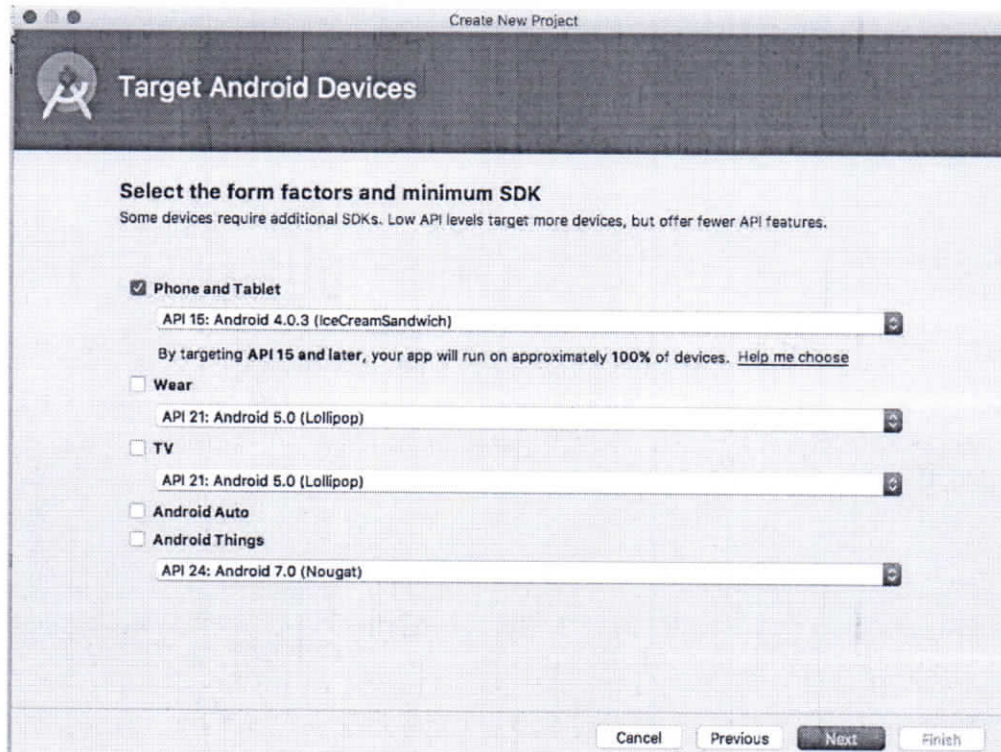

7. On the **Target Android Devices** screen, “Phone and Tablet” should be selected. And you should ensure that API 15: Android 4.0.3 IceCreamSandwich is set as the **Minimum SDK**. (Fix this if necessary.)

# Google Developers Training

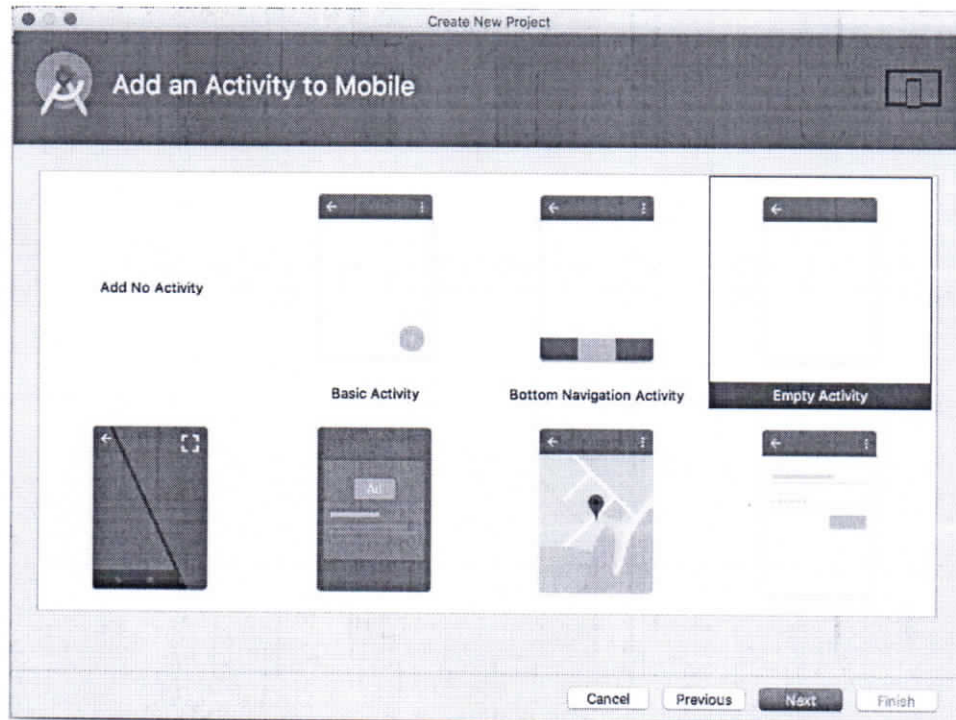

- At the writing of this book, choosing this API level makes your “Hello World” app compatible with 97% of Android devices active on the Google Play Store.
  - These are the settings used by the examples in this book.
8. Click **Next**.

9. If your project requires additional components for your chosen target SDK, Android Studio will install them automatically. Click **Next**.
10. **Customize the Activity** window. Every app needs at least one activity. An activity represents a single screen with a user interface and Android Studio provides templates to help you get started. For the Hello World project, choose the simplest template (as of this writing, the “Empty Activity” project template is the simplest template) available.

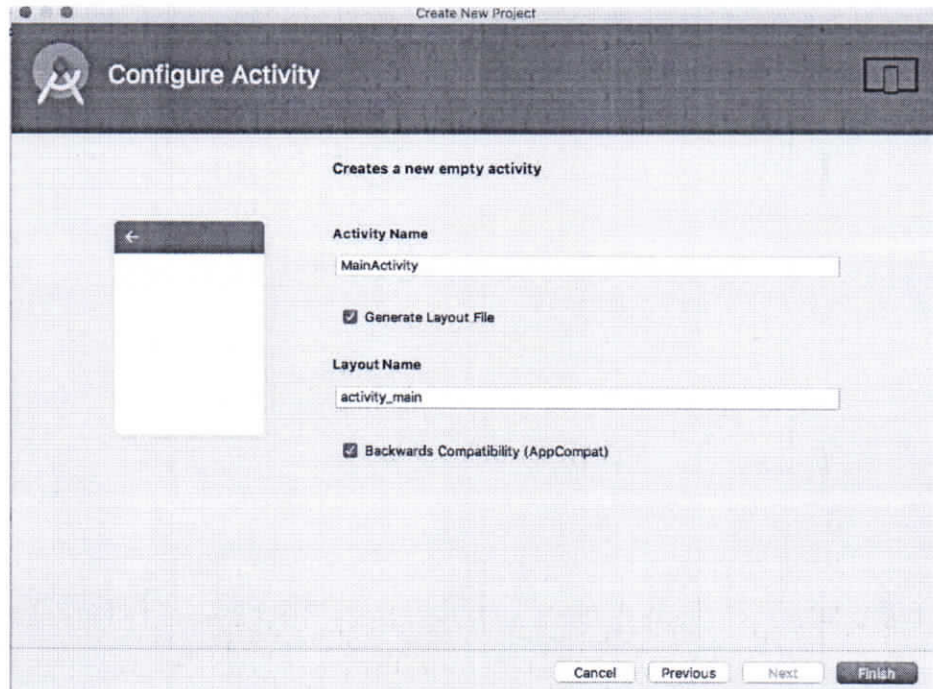

# Google Developers Training

11. It is a common practice to call your main activity MainActivity. This is not a requirement.
12. Make sure the **Generate Layout file** box is checked (if visible).
13. Make sure the **Backwards Compatibility (App Compat)** box is checked.
14. Leave the **Layout Name** as activity\_main. It is customary to name layouts after the activity they belong to. Accept the defaults and click **Finish**.

# Google Developers Training

After these steps, Android Studio:

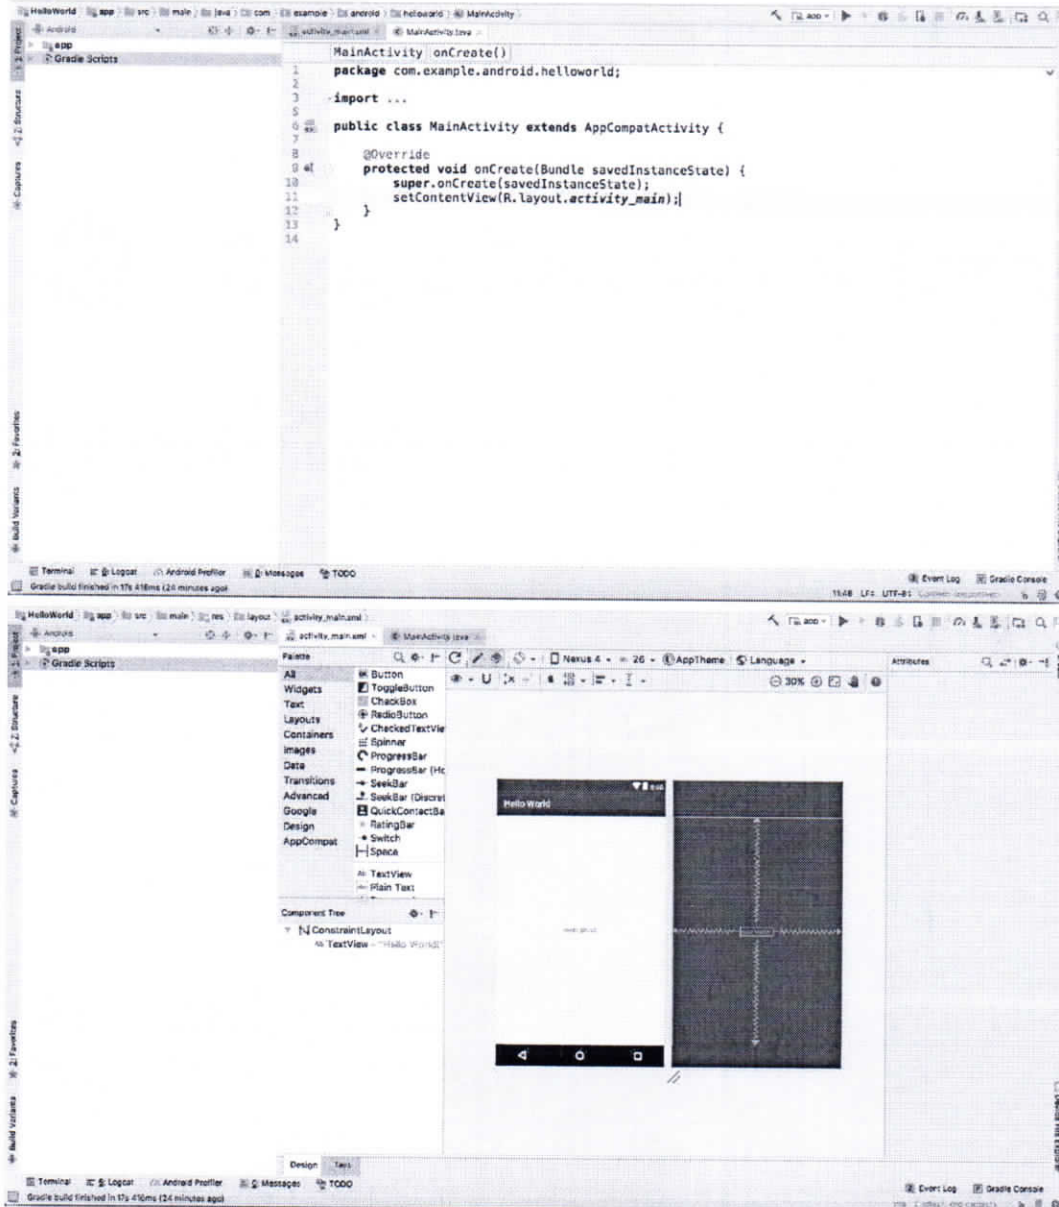

- Creates a folder for your Android Studio Projects.
- Builds your project with [Gradle](#) (this may take a few moments). Android Studio uses Gradle as its build system. See the [Configure your build](#) developer page for more information.
- Opens the code editor with your project.
- Displays a tip of the day.
  - Android Studio offers many keyboard shortcuts, and reading the tips is a great way to learn them over time.

The Android Studio window should look similar to the following diagram:

# Google Developers Training

# Google Developers Training

```
1 <?xml version="1.0" encoding="utf-8"?>
2 <android.support.constraint.ConstraintLayout xmlns:android="http://schemas.android.com/apk/res/android"
3     xmlns:app="http://schemas.android.com/apk/res-auto"
4     xmlns:tools="http://schemas.android.com/tools"
5     android:layout_width="match_parent"
6     android:layout_height="match_parent"
7     tools:context="com.example.android.helloworld.MainActivity">
8
9     <TextView
10        android:layout_width="wrap_content"
11        android:layout_height="wrap_content"
12        android:text="Hello World!"
13        app:layout_constraintBottom_toBottomOf="parent"
14        app:layout_constraintLeft_toLeftOf="parent"
15        app:layout_constraintRight_toRightOf="parent"
16        app:layout_constraintTop_toTopOf="parent" />
17
18 </android.support.constraint.ConstraintLayout>
19
```

## 4. Create a virtual device (emulator)

In this task, you will use the [Android Virtual Device \(AVD\) manager](#) to create a virtual device or emulator that simulates the configuration for a particular type of Android device.

Using the AVD Manager, you define the hardware characteristics of a device and its API level, and save it as a virtual device configuration.

When you start the Android emulator, it reads a specified configuration and creates an emulated device that behaves exactly like a physical version of that device, but it resides on your computer.

**Why:** With virtual devices, you can test your apps on different devices (tablets, phones) with different API levels to make sure it looks good and works for most users. You do not need to depend on having a physical device available for app development.

### 4.1 Create a virtual device

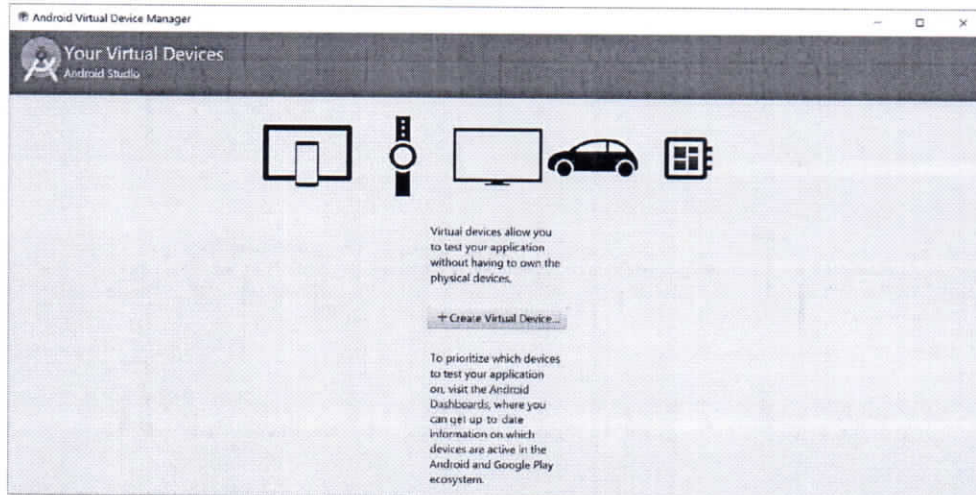

In order to run an emulator on your computer, you have to create a configuration that describes the virtual device.

1. In Android Studio, select Tools > Android > AVD Manager, or click the AVD Manager

icon  in the toolbar.

# Google Developers Training

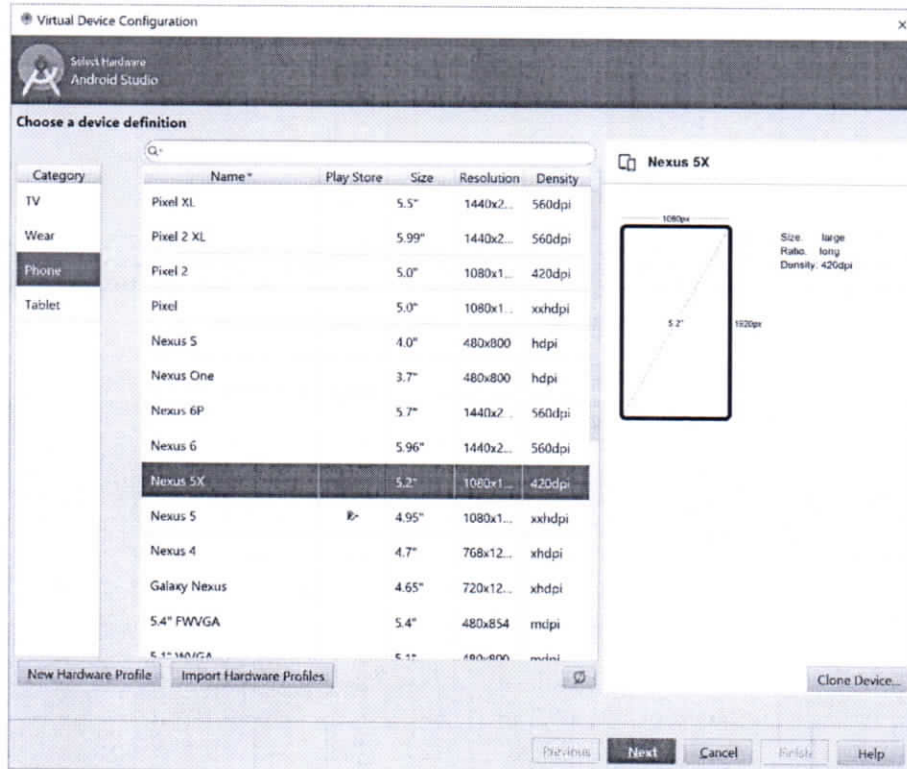

2. Click the **+Create Virtual Device....** (If you have created a virtual device before, the window shows all of your existing devices and the button is at the bottom.)

The Select Hardware screen appears showing a list of preconfigured hardware devices. For each device, the table shows its diagonal display size (Size), screen resolution in pixels (Resolution), and pixel density (Density).

3. Choose the Nexus 5X hardware device and click **Next**.

# Google Developers Training

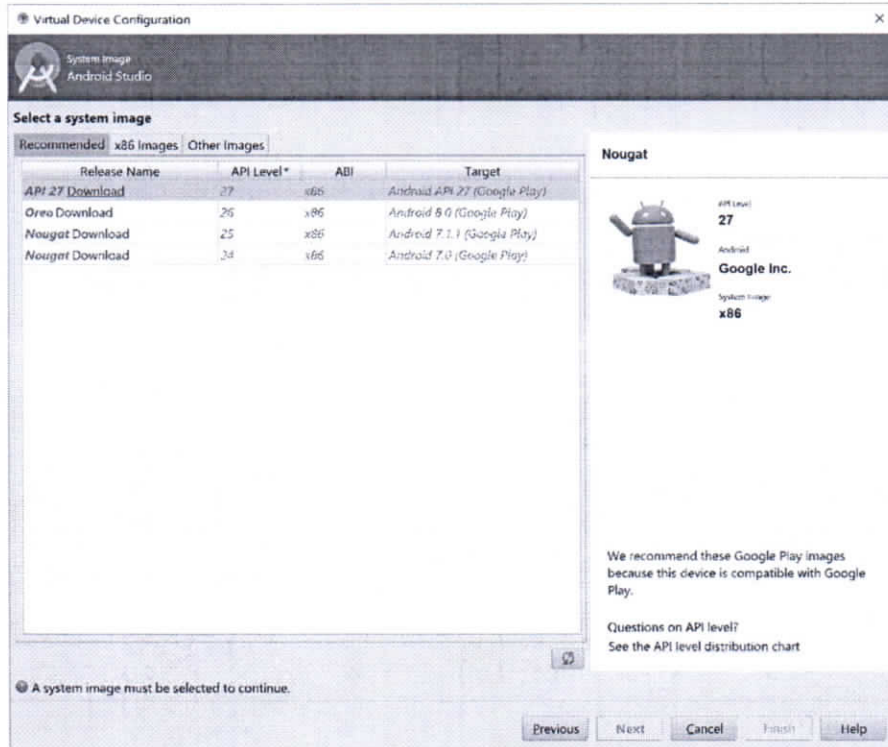

4. On the **System Image** screen, from the **Recommended** tab, choose which version of the Android system to run on the virtual device. You can select the latest system image.

There are many more versions available than shown in the **Recommended** tab. Look at the **x86 Images** and **Other Images** tabs to see them.

# Google Developers Training

5. If a **Download** link is visible next to a system image version, it is not installed yet, and you need to download it. If necessary, click the link to start the download, and click **Finish** when it's done.

# Google Developers Training

## 5. Run your app on an emulator

In this task, you will finally run your Hello World app.

### 5.1 Run your app on an emulator

1. In Android Studio, select **Run > Run app** or click the **Run icon**  in the toolbar.
2. In the **Select Deployment Target** window, under **Available Emulators**, select **Nexus 5X API 26** and click **OK**.

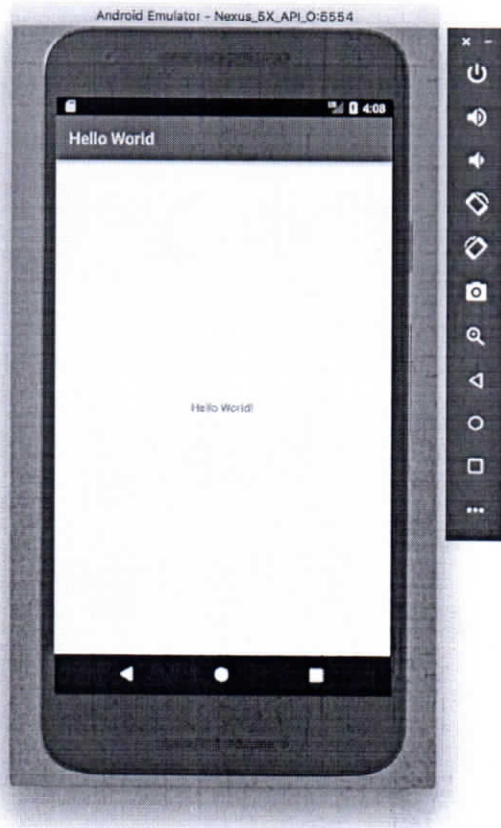

The emulator starts and boots just like a physical device. Depending on the speed of your computer, this may take a while. Your app builds, and once the emulator is ready, Android Studio will upload the app to the emulator and run it.

You should see the Hello World app as shown in the following screenshot.

# Google Developers Training

---

**Note:** When testing on an emulator, it is a good practice to start it up once, at the very beginning of your session. You should not close the emulator until you are done testing your app, so that your app doesn't have to go through the boot process again.

 Subject: MDF @ Hyderabad  
 To: <murali.kanthi@gmail.com>

Hi Murali: It was talking to you. As discussed I am sharing details of the Mobile Developer Fest (MDF) we rolled out across India in October. It will be great to have your college in Hyderabad host one of the MDFs

**Mobile Developer Fest**

Mobile Developer Fest (MDF) is a day-long developer event at colleges that offers speaker sessions across multiple product areas, CodeLabs and more. It is aimed at inspiring and training large cohorts of aspiring mobile developers.

**Objectives:**

- >>Inspire computer science and engineering student community on campus on mobile skilling.
- >>Offer high-quality, accelerated training to students on emerging mobile technologies and platform.
- >> Showcase Google India's mobile skilling programme and the portfolio of open-source courses, Codelabs and certification
- >>Encourage students to aim for certification via self-paced online learning and offline training via Google-trained faculty and Developer Student Clubs

**Agenda for 1st MDF**

8:00 - 9:00	Registration
9:00 - 9:30	Welcome keynote
9.30 - 11:00	Codelab I: Build your first Android app
11:00 -11:15	Break
11:15 -11:45	Tech Talk: Building for Next Billion Users
11:45 -12:45	Codelab II: Building the Stamp Collector app
12: 45 - 1:30	Lunch
1:30 -2:00	Panel discussion: Developer stories
2:00-3:00	Codelab III: Stamp Collector 2.0 - Storing data
3:00-3:30	Student Initiatives: Developer Student Clubs & University Innovation Fellows
3:30-4:00	Closing note and Open House

**Website**

<https://events.withgoogle.com/mdf/>

What we need from you:

- 1) Availability of venue for two days (one day for the event and previous day for the set-up)
- 2) Auditorium that can seat 300-500 students
- 3) Help in registering students who will be interested in attending the event full day
- 4) For Android track, we need students who know Java as it will involve Codelabs. Students are encouraged to bring fully-charged laptops with Android Studio pre-installed.
- 5) Photos of the venue along with details like light, sound and internet (if available).
- 6) Possible dates when the event can take place.

Please share these details ASAP as that we can send our agency to do the reeve at the earliest.

Thanks

## Hosting MDF @ CMR Technical Campus - Hyderabad - Reg

Mathang Seshagiri <mathang@google.com>

Mon, Jul 9, 2018 at 1:22 PM

To: Dr srujan <drksrujanraju@gmail.com>, murali kanthi <murali.kanthi@gmail.com>

Dear Dr Srujan: I am writing to confirm that we are hosting MDF Hyderabad in your college on July 26 and 27.

July 26 will be for Codelabs and we require 60 computers with 8GB RAM so that we can run Android Studio. There will be two sessions--9 am to 12 pm and 1 pm to 4 pm. So in total 120 students can get trained.

July 27 will be MDF main event in the college auditorium. We expect 500 participants.

Here is the draft agenda:

8:30 -9:30	60 mins	Registration
9:30-10:00	30 mins	Welcome Keynote
10:00-10:45	45 mins	Tech Talk I: Google Cloud Platform and ML Services
10:45-11:30	45 mins	Tech Talk II: Introduction to Machine Learning and it's applications
11:30-11:45	15 mins	Break
11:45-12:05	20 mins	Panel Discussion: Developer Stories
12:05-12:45	40 mins	Tech Talk III: Crafting User Interfaces on Android
12:45-1:25	40 mins	Tech Talk IV: Android Performance Patterns
1:25-1:30	5 mins	Closing Note

Please note that MDF are open events meant only for students and do not carry any participation fee. We will serve lunch on both days. Please share your college's Twitter account so that we can tag you in our social posts.

We will be making the MDF events website live later this week and your students can register after that.

Please feel free to contact me should you have any questions.

Thanks  
Mathang

Dear Seshagiri,

Greetings from "CMR Technical Campus",

we are very thankful to you for choosing our College to host Prestigious MDF, in this regard we are happy to extend our support to make this event a grand success.

Thanking you

Subject: MDF Impact Survey  
To: <hodcse@cmrtc.ac.in>, Sudhakar K. N <sudhakar.kn@cmrit.ac.in>

Professors Manoj and Sudhakar:

We have just rolled out an **MDF Impact Survey** to gather success stories from participants who attended MDF in Bangalore.

The idea is to find out what happened after the MDF? Did students join a DSC in their city? Did they build some cool apps? Did they enrol on Udacity or Pluralsight or even get certified?

I have already sent them emails. In case some of them have not received it, please get them to fill this short survey form: <https://goo.gl/forms/janoDsw7ho7f8LwB2>

Please encourage as many students to share their success stories.

Thank you.
