Learning:

In this webinar we have learned about what the current industry's needs and requirements and what do we is expected out of us as engineers. It also highlighted the need for practical exposure for students like hackathons, projects and other initiatives. They also highlighted the need to start early and prepare and gain master over various domains irrespective of the branch choosen. It also stated the very need for students to build up skills and also have a very good grip over the practicality and applicative approaches of subjects taught. Over all it was a win- win for all and students had a lot of information to take back and work upon.

This report is electronically generated against report submitted for 2018-19 IIC Calendar year on Institution's Innovation Council Portal.
