

Guest Lecture was organised by EDC Cell, CMR technical Campus on 27.04.2022 from 10:30 am to 12:30 pm by Mr. Kesavan has taken lecture on “Role of Engineer: Social perspective” at Auditorium, D- Block in this session total 120students and faculty participated. The speaker explains about how Engineers play a crucial role in society by designing, developing, and testing products and systems that improve our daily lives. They use scientific and mathematical principles to solve complex problems and create innovative solutions that benefit people and the environment. In addition to their technical expertise, engineers must also consider the social implications of their work and ensure that their designs are safe, ethical, and equitable. By working together with other professionals, such as policymakers, researchers, and community leaders, engineers can help create a more sustainable and just society.
