CALL FOR PAPERS

The objective of **ICICC 2025** is to provide a platform for academicians, researchers, scientists, professionals, and students to share their knowledge and expertise in the field of Intelligent Computing, Communication, and Convergence, as well as to address a variety of issues in order to raise awareness of technological innovations and to identify challenges and opportunities for the development of smart cities using multidisciplinary approaches. The aim of this conference is to provide a unified forum for advanced, multi-disciplinary research on smart computing and informatics design. On a larger scale, the theme focuses on numerous innovation paradigms in system knowledge, intelligence, and sustainability that can be used to deliver practical solutions to a wide range of challenges in society, the environment, and industry.

TRACKS

Authors are invited to submit original papers on the topics listed below, but no limited to:

- Machine Learning and Deep Learning for Information Systems
- Natural Language Processing and Text Analytics
- Knowledge Representation and Reasoning
- Sentiment Analysis and Opinion Mining
- Intelligent Data Integration and Fusion
- AI-driven Decision Support Systems
- Cognitive Computing and Smart Systems
- Intelligent User Interfaces and Human-Computer Interaction
- Big Data Management and Processing

Accepted papers will be included in the prestigious Lecture Notes in Networks and Systems (LNNS) series by Springer, indexed in Scopus and other major databases

* Waiting for approval from Springer
