Description about the Event:.

The Cognizant Foundation India organized a community-focused development event aimed at promoting education, digital literacy, and employability skills among students and youth. The event was conducted on 8 Dec 2025 CMRTC. It brought together beneficiaries from the students, Cognizant employee volunteers, partner NGOs, and school representatives, creating a collaborative environment focused on social impact and sustainable development.

The training program focused on developing both **soft skills** and **Java back-end developer technical skills** to enhance participants' overall employability. The soft skills component covered communication skills, workplace etiquette, teamwork, problem-solving, and interview readiness, enabling participants to present themselves confidently in professional environments. The technical training emphasized core Java concepts, object-oriented programming, database connectivity (JDBC), basic SQL, and an introduction to back-end application development. Practical sessions and hands-on exercises helped participants gain real-world exposure, while the combined approach ensured learners were equipped with both technical competence and essential professional skills.
