

## Kare 🌟 Save – Vision & Mission

### Vision

To build a sustainable society where no edible food is wasted, no person goes hungry, and no organic resource harms the environment.

Kare 🌟 Save envisions self-reliant communities operating in harmony with nature — where waste is continuously converted into value, livelihoods are generated locally, and daily living becomes environmentally responsible.

Our vision is a circular ecosystem in which food, energy, soil, and materials remain in use, reducing pollution while improving quality of life for people and the planet.

### Mission

Kare 🌟 Save operates an integrated community model that simultaneously addresses hunger, waste management, clean energy, sustainable agriculture, plastic reduction, and livelihood creation.

#### Food Security

Rescue safe surplus food from multiple sources

Provide timely meals to vulnerable communities

Prevent edible food from entering landfills

#### Resource Recovery & Clean Energy

Convert unavoidable food waste into biogas

Provide affordable and low-emission cooking fuel

Reduce dependence on conventional fuels

#### Soil Regeneration

Process biogas residue into organic compost

Improve soil fertility and structure

Support farmers in reducing chemical fertilizer usage

#### Sustainable Alternatives to Plastic

Manufacture biodegradable grow pots

Develop clay-based water systems and eco-friendly bottles

Introduce plant-based hygiene products

## **Livelihood Development**

Create decentralized micro-cluster employment

Support traditional artisans and local workers

Enable community ownership and participation

## **Transparency & Community Engagement**

Digitally track operations and impact

Encourage responsible participation

Build long-term environmental awareness

## **Purpose**

Kare 🌻 Save exists to transform care into a structured system — where feeding people, protecting nature, and empowering communities happen together in one continuous cycle.
